K-5 Course Catalog

Reading

Reading

Course Number: RDG

Course Number: RDGKG

Course Number: RDGKG

Course Number: RDG01

Reading courses develop students' readiness for language arts learning in **reading**, writing, listening, and speaking. This course includes activities related to phonics, phonemic awareness, and vocabulary. Content is age appropriate and conforms to any existing state standards for reading education.

Reading KG

Language Arts (kindergarten) courses engage students in activities to develop their language arts skills (**reading**, writing, listening, and speaking). This course content emphasizes storytelling or reading aloud and evoking a written, oral, or pictorial response. Specific content depends upon state standards for kindergarten and our focus on the use of priority standards.

YC2S Reading KG

Language Arts (kindergarten) courses engage students in activities to develop their language arts skills (**reading**, writing, listening, and speaking). This course content emphasizes storytelling or reading aloud and evoking a written, oral, or pictorial response. Specific content depends upon state standards for kindergarten and our focus on the use of priority standards. We use the HMH Anywhere curriculum.

Reading 1

Language Arts (grade 1) courses include the four aspects of language use: **reading**, writing, speaking, and listening. This course emphasizes recognition of and response to various types of text, extension of vocabulary and writing skills, and the connection of language to the expression of ideas. Specific content depends upon state standards for grade 1 and our focus on the use of priority standards.

YC2S Reading 1

Course Number: RDG01

Language Arts (grade 1) courses include the four aspects of language use: **reading**, writing, speaking, and listening. This course emphasizes recognition of and response

to various types of text, extension of vocabulary and writing skills, and the connection of language to the expression of ideas. Specific content depends upon state standards for grade 1 and our focus on the use of priority standards. We use the HMH Anywhere curriculum.

Reading 2

Language Arts (grade 2) courses include the four aspects of language use: reading, writing, speaking, and listening. This course builds on students' skills in independent reading and writing by increasing reading and writing fluency, vocabulary, and recognition of word and language patterns. They may also introduce or reinforce the rules of grammar. Specific content depends upon state standards for grade 2 and our focus on the use of priority standards.

YC2S Reading 2

Language Arts (grade 2) courses include the four aspects of language use: **reading**, writing, speaking, and listening. This course builds on students' skills in independent reading and writing by increasing reading and writing fluency, vocabulary, and recognition of word and language patterns. They may also introduce or reinforce the rules of grammar. Specific content depends upon state standards for grade 2 and our focus on the use of priority standards. We use the HMH Anywhere curriculum.

Reading 3

Language Arts (grade 3) courses include the four aspects of language use: reading, writing, speaking, and listening. This course emphasizes independent reading and writing in a variety of assignments. Some emphasis may also be placed on presentation or oral communication skills. Specific content depends upon state standards for grade 3 and our focus on the use of priority standards.

YC2S Reading 3

Language Arts (grade 3) courses include the four aspects of language use: reading, writing, speaking, and listening. This course emphasizes independent reading and writing in a variety of assignments. Some emphasis may also be placed on presentation or oral communication skills. Specific content depends upon state standards for grade 3 and our focus on the use of priority standards. We use the HMH Anywhere curriculum.

Reading 4

Course Number: RDG04

Language Arts (grade 4) courses include the four aspects of language use: reading, writing, speaking, and listening. This course emphasizes independent reading and writing in a variety of assignments students to respond to different material in different ways. Grammar and usage of the English language may also be

Science

Science

Course Number: SCI

Course Number: MAT05

Course Number: MAT05

The science (pre-kindergarten) course covers foundational skills and concepts related to science, such as investigation and observation. Content is age-appropriate and conforms to any existing state standards and our focus on the use of priority standards.

Science KG

Course Number: SCIKG

The science (kindergarten) course encourages students to observe and describe properties of organisms, systems, and the environment. Students raise questions, identify patterns, and record observations. Specific content depends upon state standards for kindergarten and our focus on the use of priority standards.

YC2S Science KG

The science (kindergarten) course encourages students to observe and describe properties of organisms, systems, and the environment. Students raise questions, identify patterns, and record observations. Specific content depends upon state standards for kindergarten and our focus on the use of priority standards. We use the HMH Anywhere curriculum.

Science 1

The science (grade 1) course allows students to identify interactions and patterns in objects and events and to record observations in written or visual form. Students investigate systems of living organisms and the environment. Specific content depends upon state standards for grade 1 and our focus on the use of priority standards.

YC2S Science 1

The science (grade 1) course allows students to identify interactions and patterns in objects and events and to record observations in written or visual form. Students investigate systems of living organisms and the environment. Specific content depends upon state standards for grade 1 and our focus on the use of priority standards. We use the HMH Anywhere curriculum.

Science 2

The science (grade 2) course continues to introduce students to basic scientific processes and principles. Course content includes identification of patterns, classification and sequencing, or manipulation of systems to observe interactions between parts and record the effects of change. Specific content depends upon state standards for grade 2 and our focus on the use of priority standards.

YC2S Science 2

The science (grade 2) course continues to introduce students to basic scientific processes and principles. Course content includes identification of patterns, classification and sequencing, or manipulation of systems to observe interactions between parts and record the effects of change. Specific content depends upon state standards for grade 2 and our focus on the use of priority standards. We use the HMH Anywhere curriculum.

Science 3

Course Number: SCI03

The science (grade 3) course involves observation, measurement, and description of simple systems. Course content may include the scientific process; life and environmental science; and physical, earth, and space science. Specific content depends upon state standards for grade 3 and our focus on the use of priority

standards.

YC2S Science 3

Course Number: SCI03

Course Number: SCI04

The science (grade 3) course involves observation, measurement, and description of simple systems. Course content may include the scientific process; life and environmental science; and physical, earth, and space science. Specific content depends upon state standards for grade 3 and our focus on the use of priority standards. We use the HMH Anywhere curriculum.

Science 4

The science (grade 4) course typically explores complex systems, such as plant and animal adaptation, forces and motion, and physical and chemical changes in matter, or content consistent with state academic standards. Students identify causes and effects of change, make predictions, and gather data from multiple sources. Specific content depends upon state standards for grade 4 and our focus on the use of priority standards.

YC2S Science 4

The science (grade 4) course typically explores complex systems, such as plant and animal adaptation, forces and motion, and physical and chemical changes in matter, or content consistent with state academic standards. Students identify causes and effects of change, make predictions, and gather data from multiple sources. Specific content depends upon state standards for grade 4 and our focus on the use of priority standards. We use the HMH Anywhere curriculum.

Science 5

The science (grade 5) course builds on the study of various systems. The course includes identification and description of cycles, comparisons of forms of matter and energy, forces, or content consistent with state academic standards. Students make comparisons and interpret and analyze information. Specific content depends upon state standards for grade 5 and our focus on the use of priority standards.

YC2S Science 5

The science (grade 5) course builds on the study of various systems. The course includes identification and description of cycles, comparisons of forms of matter and energy, forces, or content consistent with state academic standards. Students make comparisons and interpret and analyze information. Specific content depends upon state standards for grade 5 and our focus on the use of priority standards. Course Number: SCI04

Social Studies

Social Studies

Social Studies (pre-kindergarten) courses provide a developmentally appropriate understanding of social studies concepts, helping students begin to develop an understanding of self and others; the concept of time (past and present events); and skills conducive to citizenship, such as group decision making. Content is age appropriate and conforms to any existing state standards and our focus on the use of priority standards.

Social Studies KG

Social Studies (kindergarten) courses generally provide initial foundations in the social studies disciplines: history, geography, civics and government, and economics. Specific content depends upon state standards for kindergarten and our focus on the use of priority standards.

YC2S Social Studies KG

Social Studies (kindergarten) courses generally provide initial foundations in the social studies disciplines: history, geography, civics and government, and economics. Specific content depends upon state standards for kindergarten and our focus on the use of priority standards. We use the HMH Anywhere curriculum.

Social Studies 1

The Social Studies (grade 1) course develops foundational skills in the social studies disciplines: history, geography, civics and government, and economics. These disciplines are often taught together and organized around a theme. Specific content depends upon state standards for grade 1 and our focus on the use of priority standards.

YC2S Social Studies 1

The Social Studies (grade 1) course develops foundational skills in the social studies disciplines: history, geography, civics and government, and economics. Music 4

The Music (grade 4) course provides activities to enable students to create and perform music, listen and respond to musical compositions, and incorporate their musical experiences with other activities and subjects. This course content usually involves understanding music as creative expression and communication, developing skill with the voice and/or musical instruments, and establishing the ability to discern and critique. This specific course content conforms to any existing state standards for grade 4 and our focus on the use of priority standards.

YC2S Music 4

The Music (grade 4) course provides activities to enable students to create and perform music, listen and respond to musical compositions, and incorporate their musical experiences with other activities and subjects. This course content usually involves understanding music as creative expression and communication, developing skill with the voice and/or musical instruments, and establishing the ability to discern and critique. This specific course content conforms to any existing state standards for grade 4 and our focus on the use of priority standards. We use the Quavers Music Curriculum.

Course Number: MUS05

The Music (grade 5) course provides activities to enable students to create and perform music, listen and respond to musical compositions, and incorporate their musical experiences with other activities and subjects. The course content usually involves understanding music as creative expression and communication, developing skill with the voice and/or musical instruments, and establishing the ability to discern and critique. This specific course content conforms to any existing state standards for grade 5 and our focus on the use of priority standards.

YCS2 Music 5

The Music (grade 5) course provides activities to enable students to create and perform music, listen and respond to musical compositions, and incorporate their musical experiences with other activities and subjects. The course content usually involves understanding music as creative expression and communication, developing skill with the voice and/or musical instruments, and establishing the ability to discern and critique. This specific course content conforms to any existing state standards for grade 5 and our focus on the use of priority standards. We use the Quavers Music Curriculum.

Art Education

Art Education

Art (pre-kindergarten) courses provide developmentally appropriate activities to foster creative expression, communication through artistic endeavor, and appreciation of culture and heritage. Although the art form typically involves visual arts (drawing, painting, sculpture, crafts, and the like), students may also explore other forms of art such as dance, music, and theater. Specific course content conforms to any existing state standards for pre-kindergarten.

Art Education K

Course Number: ARTKG

Course Number: ART

Art (kindergarten) courses provide developmentally appropriate activities to foster creative expression, communication through artistic endeavor, and appreciation of culture and heritage. Although the art form typically involves visual arts (drawing, painting, sculpture, crafts, and the like), students may also explore other forms of art such as dance, music, and theater. Specific course content conforms to any existing state standards for kindergarten.

YC2S Art Education K

Art (kindergarten) courses provide developmentally appropriate activities to foster creative expression, communication through artistic endeavor, and appreciation of culture and heritage. Although the art form typically involves visual arts (drawing, painting, sculpture, crafts, and the like), students may also explore other forms of art such as dance, music, and theater. Specific course content conforms to any existing state standards for kindergarten.

Art Education 1

Art (grade 1) courses provide to students activities that foster creative expression, communication through artistic endeavor, and appreciation of culture and heritage. Activities may include those that enable students to refine their technique, increase their artistic vocabulary, and strengthen their critical abilities. Although the art form typically involves visual arts (drawing, painting, sculpture, crafts, and the like), students may also explore other forms of art such as dance, music, and theater. Specific course content conforms to any existing state standards for grade 1.

YC2S Art Education 1

Art (grade 1) courses provide to students activities that foster creative expression, communication through artistic endeavor, and appreciation of culture and heritage. Activities may include those that enable students to refine their technique, increase their artistic vocabulary, and strengthen their critical abilities. Although the art form typically involves visual arts (drawing, painting, sculpture, crafts, and the like), students may also explore other forms of art such as dance, music, and theater. Specific course content conforms to any existing state standards for grade 1.

Art Education 2

Art (grade 2) courses provide to students activities that foster creative expression, communication through artistic endeavor, and appreciation of culture and heritage. Activities may include those that enable students to refine their technique, increase their artistic vocabulary, and strengthen their critical abilities. Although the art form typically involves visual arts (drawing, painting, sculpture, crafts, and the like), students may also explore other forms of art such as dance, music, and theater. Specific course content conforms to any existing state standards for grade 2.

YC2S Art Education 2

Art (grade 2) courses provide to students activities that foster creative expression, communication through artistic endeavor, and appreciation of culture and heritage. Activities may include those that enable students to refine their technique, increase their artistic vocabulary, and strengthen their critical abilities. Although the art form typically involves visual arts (drawing, painting, sculpture, crafts, and the like), students may also explore other forms of art such as dance, music, and theater. Specific course content conforms to any existing state standards for grade 2.

Ypsilanti Community Schools

6-8 Course Catalog

English Language Arts

English Language Arts

Our Language Arts courses build upon students' prior knowledge of grammar, vocabulary, word usage, and the mechanics of writing, and include the four aspects of language use: reading, writing, speaking, and listening. These courses use various genres of literature to improve reading skills, and they link writing exercises for different purposes to those reading selections. Specific content depends upon state standards and our focus on the use of priority standards.

English Language Arts 6

The English Language Arts (grade 6) course builds upon students' prior knowledge of grammar, vocabulary, word usage, and the mechanics of writing, and includes the four aspects of language use: reading, writing, speaking, and listening. This course emphasizes the use of language for different effects, in different contexts, and for different purposes. Specific content depends upon state standards for grade 6 and our focus on the use of priority standards.

YC2S English Language Arts 6

The English Language Arts (grade 6) course builds upon students' prior knowledge of grammar, vocabulary, word usage, and the mechanics of writing, and includes the four aspects of language use: reading, writing, speaking, and listening. This course emphasizes the use of language for different effects, in different contexts, and for different purposes. Specific content depends upon state standards for grade 6 and our focus on the use of priority standards.

English Language Arts 7

The English Language Arts (grade 7) course builds upon students' prior knowledge of grammar, vocabulary, word usage, and the mechanics of writing, and includes the four aspects of language use: reading, writing, speaking, and listening. Beyond emphasizing different uses for language, this course includes using language (particularly written text) to construct meaning and connections. Specific content depends upon state standards for grade 7 and our focus on the use of priority standards.

YC2S English Language Arts 7

The English Language Arts (grade 7) course builds upon students' prior knowledge of grammar, vocabulary, word usage, and the mechanics of writing, and includes the four aspects of language use: reading, writing, speaking, and listening. Beyond

Physical Education

Physical Education

The Physical Education courses typically involve the acquisition of knowledge and skills that provide the foundation for sport, a physically active lifestyle, and social development through physical activity. Activities typically include those that increase strength, endurance, and flexibility; reinforce safe technique; teach the rules and conventions of games and sports; and explore the relationship between physical activity and health. Health topics (such as the effects of drugs and alcohol, sexual education, and healthy lifestyles) may also be included. Specific content depends

Physical Education 8

The Physical Education (grade 8) course involves the acquisition of knowledge and skills that provide the foundation for sport, a physically active lifestyle, and social development through physical activity. Activities include those that increase strength, endurance, and flexibility; reinforce safe technique; teach the rules and conventions of games and sports; and explore the relationship between physical activity and health. Health topics (such as the effects of drugs and alcohol, sexual education, and healthy lifestyles) may also be included. Specific content depends upon state standards for grade 8 and our focus on the use of priority standards.

YC2S Physical Education 8

Music

Music

Course Number: MS551391

The Music (grades 6-8) courses enable students to create and perform music, listen and respond to musical compositions, and incorporate their musical experiences with other activities and subjects. Course content usually involves understanding music as creative expression and communication, developing skill with the voice and/or musical instruments, and refining the ability to discern and critique. Specific course content conforms to any existing state standards for grades 6-8 and our focus on the use of priority standards.

YC2S Music

Course Number: MS551391

The Music (grades 6-8) courses enable students to create and perform music, listen and respond to musical compositions, and incorporate their musical experiences with other activities and subjects. Course content usually involves understanding music as creative expression and communication, developing skill with the voice and/or musical instruments, and refining the ability to discern and critique. Specific course content conforms to any existing state standards for grades 6-8 and our focus on the use of priority standards. We use the Quavers Music curriculum.

Course Number: MS580381

Art

Course Number: MS55189

Course Number: MS55189

The Art (grades 6-8) courses provide to students activities that foster creative expression, communication through artistic endeavor, and appreciation of culture and heritage. Activities may include those that enable students to refine their technique, increase their artistic vocabulary, express themselves and their world world world world will be connections to other content areas, develop their own aesthetic, and strengthen their critical abilities. Although typically involving the visual arts (drawing, painting, sculpture, crafts, and the like), these courses may also include other forms of art (for example, dance, music, and theater). Specific course content conforms to any existing state standards for grades 6-8 and our focus on the use of priority standards.

YC2S Art

The Art (grades 6-8) courses provide to students activities that foster creative expression, communication through artistic endeavor, and appreciation of culture and heritage. Activities may include those that enable students to refine their technique, increase their artistic vocabulary, express themselves and their world world wiew, make connections to other content areas, develop their own aesthetic, and strengthen their critical abilities. Although typically involving the visual arts (drawing, painting, sculpture, crafts, and the like), these courses may also include other forms of art (for example, dance, music, and theater). Specific course content conforms to any existing state standards for grades 6-8 and our focus on the use of priority standards.

Living Skills

Living Skills

The Living Skills courses provide information about a wide range of subjects to assist students in becoming wise consumers and productive adults. These courses often emphasize such topics as goal setting, decision-making, and setting priorities; money and time management; relationships; and the development of the self. Practical exercises regarding selecting and furnishing houses, meeting transportation needs, preparing food, selecting clothing, and building a wardrobe are often integral to these classes. In addition, specific topics such as insurance, taxation, and consumer protection may also be covered and our focus on the use of priority standards.

YC2S Living Skills

STEM

STEM

The STEM specific content courses vary, but they draw upon the principles of several scientific specialties—earth science, physical science, biology, chemistry, and physics—and organize the material around thematic units. Common themes covered include systems, models, energy, patterns, change, and constancy. These courses use appropriate aspects from each specialty of STEM to investigate applications of the theme and our focus on the use of priority standards.

YC2S STEM

Course Number: MS70000

Applied Engineering & Technology

Applied Engineering & Technology

The Applied Engineering & Technology courses provide an opportunity to focus on one or more areas of industrial technology. Students apply technological processes to solve real engineering problems; develop the knowledge and skills to design, modify, use, and apply technology; and may also design and build prototypes and working models. Topics covered in the course include the nature of technology, use of technology, and design processes and our focus on the use of priority standards.

Reading Intervention

Reading Intervention

The Reading Intervention courses are intended to improve a student's vocabulary, critical-thinking and analysis skills, or reading rate and comprehension level. Although these courses typically emphasize works of fiction, they may also include works of nonfiction (including textbooks). Reading Intervention courses often have a time-management focus, offering strategies for note taking or for understanding and evaluating the important points of a text and our focus on the use of priority standards.

Course Number: MS720031

Course Number: MS720031

Course Number: MSE101

YC2S Academic Enrichment

The Academic Enrichment courses provide the assistance students need to successfully complete their coursework in different content areas. Students may receive help in one or several subjects and our focus on the use of priority standards.

Advisory

Advisorv

Student Advisory provides the opportunity and time for students to complete classroom assignments or school projects. Students typically work on their own, without the help of a tutor; however, they are supervised and usually remain in the classroom. In Student Advisory, each student in the school is assigned a teacher or staff member who assists the student in achieving his or her academic and personal goals. Advisory usually has two distinct parts: an advisory class, similar to a homeroom, and one-to-one support to address personal issues. While their goals are similar, schools organize and implement their advisory programs in a variety of ways depending on the needs of the school community and our focus on the use of priority standards.

The Technology courses provide to students the knowledge and ability to use computers and technology efficiently. Typically, course content includes exposure to word-processing, spreadsheet, and presentation applications, but also may include the various uses of computers in modern society. Specific course content aligns with state standards to promote students' technological literacy and our focus on the use of priority standards.

World Languages

Spanish Grade 6

Spanish (grade 6) course engages students in language arts skills (listening, speaking, reading, and writing) necessary to communicate in Spanish. Cultural and/or historical aspects of the people(s) speaking the language(s) being studied are typically included as topics of study. Specific content depends upon state standards for grade 6.

YC2S Spanish Grade 6 MS504106

Spanish (grade 6) course engages students in language arts skills (listening, speaking, reading, and writing) necessary to communicate in Spanish. Cultural and/or historical aspects of the people(s) speaking the language(s) being studied are typically included as topics of study. Specific content depends upon state standards for grade 6.

Spanish Grade 7

Spanish (grade 7) course emphasizes the language arts skills (listening, speaking, reading, and writing) necessary to communicate in Spanish. Grammar and syntax, vocabulary, and applicable accents typically are studied so that students have the knowledge and ability to express themselves and understand others. Students usually explore the customs, history, and art forms of the people(s) whose language is being studied. Specific content depends upon state standards for grade 7.

Ypsilanti Community Schools

9-12 YCHS ACTech/STEMM Course Catalog

Mathematics Courses

Algebra 1 (0.5 credit)

Course Number: H0020520101

Algebra I includes the study of properties and operations of the real number system; solving and graphing first degree equations and inequalities; translating word problems into equations; exponential growth and decay, systems of linear equations, introduction to statistics, operations with and factoring of polynomials; and introductions to graphs of quadratic equations.

Algebra 1 A Honors (0.5 credit) Algebra 1 B Honors (0.5 credit)

Algebra I Honors includes the study of properties and operations of the real number system; solving and graphing first degree equations and inequalities; translating word problems into equations; exponential growth and decay, systems of linear equations, introduction to statistics, operations with and factoring of polynomials; and introductions to graphs of quadratic equations.

Algebra 2 Honors A (0.5 credit) Algebra 2 Honors B (0.5 credit)

Algebra II Honors topics include a review of linear equations and inequalities; operations with rational and irrational expressions; transformations, factoring of rational expressions; quadratic equations; solving systems of linear and nonlinear equations; graphing of functions; properties of polynomial equations; and properties of radical functions, investigating exponential and logarithmic growth and decay, and further work into data analysis and statistics.

Algebra II A (0.5 credit) Algebra II B (0.5 credit)

Algebra II topics include a review of linear equations and inequalities; operations with rational and irrational expressions; transformations, factoring of rational expressions; quadratic equations; solving systems of linear and nonlinear equations; graphing of functions; properties of polynomial equations; and properties of radical functions, investigating exponential and logarithmic growth and decay, and further work into data analysis and statistics.

Applied Algebra 2 A (0.5 credit) Applied Algebra 2 B (0.5 credit)

Applied Algebra II topics include a review of linear equations and inequalities; operations with rational and irrational expressions; transformations, factoring of rational expressions; quadratic equations; solving systems of linear and nonlinear equations; graphing of functions; properties of polynomial equations; and properties of radical functions, investigating exponential and logarithmic growth and decay, and further work into data analysis and statistics.

Applied Consumer Math (0.5 credit)

Consumer Math courses reinforce general math topics (such as arithmetic using rational numbers, measurement, ratio and proportion, and basic statistics) and apply these skills to consumer problems and situations. Applications typically include budgeting, taxation, credit, banking services, insurance, buying and selling products and services, home and/or car ownership and rental, managing personal income, and investment.

Applied Geometry A & B (1.0 credit)

Course Number: HRR1000

Course Number: H0205601 **Course Number: H0205612**

Course Number: H02056018

Course Number: H02056019

Course Number: 0205302H

Course Number: 0205402H

Course Number: H0205601H

Course Number: H0205602H

Applied Geometry OL topics include transformations, concepts of congruence, similarity, angle relationships within parallel and perpendicular lines, proportions, rules of angle measurements of polygons, exploring dimensional measurement, area and volume of shapes, right triangle trigonometry, and data analysis and statistics.

Geometry A (0.5 credit) Geometry B (0.5 credit)

Geometry topics include transformations, concepts of congruence, similarity, angle relationships within parallel and perpendicular lines, proportions, rules of angle measurements of polygons, exploring dimensional measurement, area and volume of shapes, right triangle trigonometry, and data analysis and statistics.

Geometry B OL (0 credit)

Geometry B OL topics include transformations, concepts of congruence, similarity, angle relationships within parallel and perpendicular lines, proportions, rules of angle measurements of polygons, exploring dimensional measurement, area and volume of shapes, right triangle trigonometry, and data analysis and statistics.

Geometry A (10th) (0.5 credit) Geometry B (10th) (0.5 credit)

Geometry 10th topics include transformations, concepts of congruence, similarity, angle relationships within parallel and perpendicular lines, proportions, rules of angle measurements of polygons, exploring dimensional measurement, area and volume of shapes, right triangle trigonometry, and data analysis and statistics.

Geometry Honors A (10th) (0.5 credit) Geometry Honors B (10th) (0.5 credit)

Geometry Honors topics include transformations, concepts of congruence, similarity, angle relationships within parallel and perpendicular lines, proportions, rules of angle measurements of polygons, exploring dimensional measurement, area and volume of shapes, right triangle trigonometry, and data analysis and statistics.

Pre-Calculus A (0.5 credit) Pre-Calculus B (0.5 credit)

Pre-Calculus combines the study of Trigonometry Functions, Analytic Geometry, and Math Analysis topics as preparation for Calculus. Topics include the study of complex numbers; polynomial, logarithmic, exponential, rational, right trigonometric, inverses and graphs; trigonometric identities and equations; conic sections; mathematical induction; matrix algebra; sequences and series; and limits and continuity.

RR Algebra A (0.5 credit) RR Algebra B (0.5 credit)

Course Number: H02052011 Course Number: H02052012

RR Algebra I includes the study of properties and operations of the real number system; solving and graphing first degree equations and inequalities; translating

Course Number: H0211001

Course Number: H0211012

Course Number: H0207201 Course Number: H0207212 word problems into equations; exponential growth and decay, systems of linear equations, introduction to statistics, operations with and factoring of polynomials; and introductions to graphs of quadratic equations.

Math Support A (0.5 credit)

This course will focus on mastery of the standards being taught in the regular math class. Opportunities will be provided for students to learn standards not previously mastered as identified through diagnostic assessment and progress monitoring. Opportunities will provide for students to preview math concepts that will be taught in the regular math class including pre-requisite skills and vocabulary. Students will also be engaged in *doing* mathematics, explaining their thinking, justifying their work, and using multiple representations of concepts to support their work in their regular math classes.

Personal Finance (0.5 credit)

Personal Finance applies these skills to consumer problems and situations. Applications typically include budgeting, taxation, credit, banking services, insurance, buying and selling products and services, home and/or car ownership and rental, managing personal income, and investment.

Financial Literacy (0.5 credit) H0207412

Financial Literacy includes the study of numeracy, financial literacy and vocabulary of Algebra I. Topics include numeracy using mathematical relationships to reason with numbers and numerical concepts, to think through the math logically, to have a repertoire of strategies to solve problems, and to be able to apply the logic outside of classrooms.

Statistical Coding Mathematics: 1 semester (0.5 credits) - (Math Experience Elective)

The Statistical Coding Mathematics course offers students an in-depth exploration of the mathematical principles and techniques essential for statistical analysis and data science. This course emphasizes the practical application of mathematical concepts through coding in relevant statistical programming languages such as R or Python.

Topics covered include:

- Throughout the course, students will engage in practical coding exercises, projects
- Real-world data analysis tasks to reinforce their understanding of mathematical concepts and their application in statistical coding.
- Analyze statistical data
- Insightful data interpretations

Course Number: H0207411 &

Course Number: H1205500

Course Number: H0299601

• How to communicate their findings effectively using statistical coding techniques.

Science Courses

Earth Science A & B (1.0 credit) H0300102

Prerequisites - Must have completed Biology. Earth Science offers insight into the environment on earth and the earth's environment in space. While presenting the concepts and principles essential to students' understanding of the dynamics and history of the earth, this course usually explores oceanography, geology, astronomy, meteorology, and geography.

Applied Biology A & B (1.0 credit)

Applied Biology is designed to provide information regarding the fundamental concepts of life and life processes. This course includes (but is not restricted to) such topics as cell structure and function, ecology, general plant and animal physiology, and genetics.

Biology A (0.5 credit) Biology B (0.5 credit)

Course Number: HH03051021

Course Number: HH03051022

Course Number: H00305100

Biology is designed to provide information regarding the fundamental concepts of life and life processes. This course includes (but is not restricted to) such topics as cell structure and function, ecology, general plant and animal physiology, and genetics.

Biology A Honors (0.5 credit) Biology B Honors (0.5 credit)

Honors Biology is designed to provide information regarding the fundamental concepts of life and life processes. This course includes (but is not restricted to) such topics as cell structure and function, ecology, general plant and animal physiology, and genetics.

Chemistry A (0.5 credit)

Course Number: H0310101 Course Number: H0310112

Chemistry B (0.5 credit) Prerequisites- Must have completed Biology and be in at least 11th grade. Students should also have completed Algebra I. Chemistry involves studying the composition, properties, and reactions of substances. This course typically explores such concepts as the behaviors of solids, liquids, and gasses; acid/base and oxidation/reduction reactions, atomic structure, and conservation of matter. Chemical formulas and equations and nuclear reactions are also studied.

Chemistry A – 10 (0.5 credit) Chemistry B – 10 (0.5 credit) **Course Number: H00310101 Course Number: H003101011**

Course Number: H0300101 &

Course Number: H0305101 Course Number: H0305112 **Prerequisites-** Must have completed Biology and be in at least 11th grade. Students should also have completed Algebra I. Chemistry for 10th graders involves studying the composition, properties, and reactions of substances. This course typically explores such concepts as the behaviors of solids, liquids, and gases; acid/base and oxidation/reduction reactions, atomic structure, and conservation of matter. Chemical formulas and equations and nuclear reactions are also studied.

Chemistry A Honors (0.5 credit)Course Number: HH0310101Chemistry B Honors (0.5 credit)Course Number: HH0310112Prerequisites- Must have completed Biology and be in at least 11th grade.Students should also have completed Algebra I. Chemistry Honors involvesstudying the composition, properties, and reactions of substances. This coursetypically explores such concepts as the behaviors of solids, liquids, and gases;acid/base and oxidation/reduction reactions, atomic structure, and conservation ofmatter. Chemical formulas and equations and nuclear reactions are also studied.

Physics A (.5 Credits) Physics B (.5 Credits)

Course Number: H0315101 Course Number: H0315102

Prerequisite: Completed Algebra I. Physics involves the study of matter and energy and the interactions between them. This course will explore the topics of motion, forces, energy, and electricity. Students will apply scientific and engineering ideas to design, build, and refine a device that minimizes the force during a collision and a device that works within given constraints to convert one form of energy into another form of energy. The study of physics may also include the examination of waves, sound, light, and magnetism.

Anatomy and Physiology A (.5 Credits) Anatomy and Physiology B (.5 Credits) Prerequisite: Have completed Biology

Course Number: H0305301 Course Number: H0305312

Anatomy and Physiology presents the human body and biological systems in more detail. In order to understand the structure of the human body and its functions, students learn anatomical terminology, study cells and tissues, explore functional systems (skeletal, muscular, circulatory, respiratory, digestive, reproductive, nervous, and so on), and may dissect mammals.

Forensics A (0.5 credit) Forensics B (0.5 credit)

Course Number: H1505501 Course Number: H1505512

Prerequisite: Have passed Biology and Chemistry- Forensic science is a laboratory-based introduction to the analysis of crime scenes that explore the collecting and analyzing of physical evidence. This course will highlight topics in DNA, genetics, anatomy, chemistry, physics, entomology, botany, and investigative techniques. In addition, the ethical, legal, and social concerns surrounding forensics will be discussed. Process skills will include comparative analysis, critical thinking, deductive reasoning, interviewing, observation, organization, problem solving, research, communication, evidence collection, lab safety, and technical reading.

Forensics A Honors (0.5 credit) Forensics B Honors (0.5 credit)

Course Number: H01505301 Course Number: H015053011

Course Number:

Prerequisite: Have passed Biology and Chemistry- Forensic Honors science is a laboratory-based introduction to the analysis of crime scenes that explore the collecting and analyzing of physical evidence. This course will highlight topics in DNA, genetics, anatomy, chemistry, physics, entomology, botany, and investigative techniques. In addition, the ethical, legal, and social concerns surrounding forensics will be discussed. Process skills will include comparative analysis, critical thinking, deductive reasoning, interviewing, observation, organization, problem solving, research, communication, evidence collection, lab safety, and technical reading.

CSI – Fact or Fiction? (1.0 credit) CSI (Elective: 1 semester; Meant for students who have not taken/will not be able to take Forensic Science due to Dual enrollment, RCTC, or credit recovery) CSI-Fact or Fiction is an introductory course into the world of criminal science. This course serves as an introductory course to forensics for people who can't take the full year course. In this class, we will briefly touch on all of the aspects to be covered in depth during senior year science. This class covers a wide range of the background material needed to be successful in forensics, such as the psychology, history, and math needed to be a successful forensic scientist. This will be done through literature studies, examining past criminal cases, and mathematical practice. In order to be successful in this class, students must have completed algebra, have some knowledge of geometry, and have completed freshman level history and English classes.

Environmental Science B (0.5 credit) Course Number: H0300312 Prerequisites- Must have completed Earth Science (B or higher), Algebra I (C or higher), and be at least in 11th grade. Students will dive deeper into the Earth's four spheres (hydrosphere, atmosphere, biosphere, and geosphere) that they learned in Earth Science. During this course they will connect the four spheres to environmental problems/policies/factors to better understand anthropogenic and biogenic impacts on the planet.

Botany & Horticulture A (0.5 credit)

Botany and horticulture focus on the perspective of how and why plants are important to humans. This includes topics such as food apartheid, improving health and nutrition, and utilizing various agricultural techniques to grow and sell vegetables, herbs, and fruit plants. Students will build upon the knowledge they have developed in Biology to learn more about plants and trees, their impact on our ecosystem, and how we impact theirs. It is an incredibly hands-on, applied science course that requires working actively with soil/dirt, seeds, plants, water, and natural fertilizers. There is a required physical activity component; this includes walking on uneven terrain (outside in the woods). Students should be comfortable and have a working knowledge of lab safety and lab equipment for measurement. Students are able to participate in a one or two-year pathway program. Upon completion of the two year program, students certify online with Washtenaw Water Resources as Master Rain Gardener.

Botany & Horticulture B (0.5 credit)

Botany and horticulture focus on the perspective of how and why plants are important to humans. This includes topics such as food apartheid, improving health and nutrition, and utilizing various agricultural techniques to grow and sell vegetables, herbs, and fruit plants. Students will build upon the knowledge they have developed in Biology to learn more about plants and trees, their impact on our ecosystem, and how we impact theirs. It is an incredibly hands-on, applied science course that requires working actively with soil/dirt, seeds, plants, water, and natural fertilizers. Students should be comfortable and have a working knowledge of lab safety and lab equipment for measurement. Students are able to participate in a one or two-year pathway program. Upon completion of the two year program, students certify online with Washtenaw Water Resources as Master Rain Gardener.

Botany & Biomimicry 2A (0.5 credit)

Botany and Biomimicry focus on scientific investigation and research on soil health and its impact by human intervention. They will care for the existing rain garden and YCS prairie, map Grizzly woods, and more. Students will build upon the knowledge they have developed in Biology to learn more about plants and trees, their impact on our ecosystem, and how we impact theirs. It is an incredibly handson, applied science course that requires working actively with soil/dirt, seeds, plants, water, and natural fertilizers. There is a required physical activity component; this includes walking on uneven terrain (outside in the woods). Students should be comfortable and have a working knowledge of lab safety and lab equipment for measurement. Students are able to participate in a one or two-year pathway program. Upon completion of the two year program, students certify online with Washtenaw Water Resources as Master Rain Gardener.

Botany & Biomimicry 2B (0.5 credit)

Botany and Biomimicry focus on scientific investigation and research on soil health and its impact by human intervention. They will care for the existing rain garden and YCS prairie, map Grizzly woods, and more. Students will build upon the knowledge they have developed in Biology to learn more about plants and trees, their impact on our ecosystem, and how we impact theirs. pathway program. Upon completion of the two year program, students certify online with Washtenaw Water Resources as Master Rain Gardener.

Technology, Engineering, and Manufacturing Courses

Introduction to Engineering (0.5 credit) Course Number: H2100100

This course introduces students to the engineering design process and its use to address societal needs by creating products, systems, and processes in order to solve problems or improve life. Students will practice applying the aspects of the design process in a series of pre-engineering activities and projects.

Engineering Applications_(0.5 credit) Course Number: H2100200

Engineering Applications will provide students with an overview of the practical uses of a variety of engineering applications. Topics covered include computer programing, robotics, Computer Aided Design (CAD), and 3-D printing

Course Number: H2104901

Advanced Engineering (0.5 credit)

This course expands on the engineering design process and integrates technologyoriented applications. Students will design and manage projects to obtain an original solution to a valid open-ended problem by applying the engineering design process. Course topics include working in teams to define real-world problems, document and apply research, develop solutions, build and test prototypes, and communicate solutions.

Creative Engineering (0.5 credit) Course Number: H2100600 Prerequisites- Must have completed Introduction to Manufacturing

In this course students will apply the design process from concept to creation through a variety of projects. Through this process students will also learn how to use many of the types of tools and equipment used in the industry today. Understanding by Design and Inquiry-based instruction will guide students in the design, construction, peer evaluation, re-design/testing and presentations of a number of real-world projects

Introduction to Manufacturing Botany (0.5 credit) Course Number: H1300101

This course introduces students to the various methods used to process and transform materials. Engineering principles will be used to explore aspects of technology, networking, modeling, maker studios, Six Sigma control techniques, and packaging. Topics that will be explored include the influence of the Industrial Revolution on manufacturing, prototyping, workshopping, and Green Design. The courses may also include an overview of management techniques in planning, organizing, and controlling various segments of the manufacturing process, including design, engineering, production, and marketing.

Advanced Manufacturing (0.5 credit) H130030103

Prerequisites- Must have completed Introduction to Manufacturing

This course introduces students to the various methods used to process and transform materials. Processing techniques covered usually include cutting, drilling, milling, assembling, and finishing. The courses may also include an overview of management techniques in planning, organizing, and controlling various segments of the manufacturing process, including design, engineering, production, and marketing.

CAD and 3-D Printing (0.5 credits) Course Number: H02110701 Computer Aided Design (CAD) and 3-D Printing - In this course, students will expand their knowledge of the design process from concept to creation by learning and applying aspects of CAD modeling. Using CAD software and reading technical drawings, they will design and assemble a wide range of parts that can be manufactured and 3D printed. Through explorative projects, students will imagine solutions to real-world problems and design products guided by their interests to create an interactive, collaborative, student-driven, learning environment.

Robotics (0.5 credit)

Using FIRST Principles, engaging our students in engineering principles to design and compete in various competitions. A variety of robotics-based projects will be used to show our students that science, technology, and problem solving are not only fun and rewarding, but are proven paths to successful careers and a bright future for us all.

Coding and Animation (0.5 credit)

(0.5 credits per semester) (CTE)

Coding is an introductory computer science course that empowers students to create authentic artifacts and engage with computer science as a medium for creativity, communication, problem solving, and fun. The course takes a wide lens on computer science by covering topics such as programming, physical computing, HTML/CSS, and data. The course inspires students as they build their own websites, apps, games, and physical computing devices

Manufacturing I & II

Graduation: 4th-year math, 3rd-year science, VPAA, Algebra II

This state-approved CTE course focuses on the aspects of manufacturing and machining with emphasis placed on the relationship between manufacturing processes and consumers. Engineering principles will be used to explore technology, networking, modeling, maker studios, Six Sigma control techniques, and packaging. This course may also include an overview of management techniques in planning, organizing, and controlling various segments of the manufacturing process, including design, engineering, production, and marketing.

Course Number: H12221001

Course Number: H001309901

Course Number: H2100901

Course Number: H130030102 &

Students may participate in the industry certification process for many of the skills learned in class.

Topics covered include: Topics that will be explored include the influence of the Industrial Revolution on manufacturing, prototyping, workshopping, CAD, Additive Manufacturing, OSHA 10, OSHA 30, Lathe, Mill, CNC, Laser Engraving, Six Sigma, Five S, Project Management, Kaizen, the Skilled Trades, and Green Design.

Outline:

- Safety; Occupational Skills / Work Habits Describe and demonstrate general workplace, personal, and machine safety. (A1)
- Inspection and Measurement; Occupational Skills / Work Habits Develop an inspection plan and inspect simple parts using precision tools and techniques. (A2)
- Print Reading and GD&T Demonstrate knowledge of understanding prints by measuring, layout, machining, and finishing parts to detailed drawings. (B1)
- Benchwork; Saws, Drills, and Power Tools Demonstrate using basic hand tools. (B2)
- Saws, Drills, and Power Tools Set up and perform cutting and sawing operations based on specifications. (B3)
- Metal Working Theory / Materials; Maintenance and Set Up; Mill I / Lathe I; Manufacturing Processes; Advanced Milling / Turning / Grinding Setup and perform machining operations to print specifications. (C1)
- Benchwork; Manufacturing Processes; Advanced Milling / Turning / Grinding Setup and perform machining operations to print specifications.
- Manufacturing Processes: CNC / CAD / CAM setup and performance of machining operations to print specifications.
- **Problem-solving:** Demonstrate problem-solving skills consistently and independently
- **Collaboration Skills:** Demonstrate collaboration skills consistently and independently.
- **Personal Management Skills** Demonstrate personal management skills consistently and independently
- **Communication Skills** Demonstrate communication skills consistently and independently
- **Employability and Career Development** (Including Portfolio Development, Safety, and Employability)

English Language Arts Courses

English 9 A (0.5 credit) English 9 B (0.5 credit)

Course Number: H0200101 Course Number: H0100112

YCS partners with HMH (Houghton Mifflin Harcourt) to provide a rigorous and indepth program of study designed to blend online and classroom learning for all K-12 students throughout our district using the Into Literature program. Through Into Literature, English 9 prepares students with a foundation in listening, speaking, reading, and writing through studies of literature and composition. Types of literature may include biographies, autobiographies, essays, short stories, dramas, speeches, and novels. Students explore literature, employing critical and analytical evaluation of literary works. Written expression lessons allow students to develop and demonstrate skills in composition, grammar usage, and the writing process. Students also make text to world connections through the selections and apply their ideas to their own life. Additionally, coursework prepares students for success on college entrance assessments such as the SAT and ACT. This course fulfills the requirements for one credit of ninth grade English for graduation.

English 9 A Honors (0.5 credit) English 9 B Honors (0.5 credit)

ELL Translator A Year 1 (0.5 credit)

This program is designed for English Language Learners who excel in their ELD or ELA courses. They will have the natural drive to support their fellow ELL peers in their educational success. This is a two-year program. Students will train with the ELL team in appropriate classroom behaviors and improve soft skills before pushing into classrooms to assist our monolingual teachers in translating instruction and helping in small group work. These students will have the opportunity to translate in classrooms, during school events, and for one-on-one instruction. Students will earn a YCHS Student-Translator Certificate at the end of their one or two-year program.

ELL Translator B Year 1 (0.5 credit)

This program is designed for English Language Learners who excel in their ELD or ELA courses. They will have the natural drive to support their fellow ELL peers in their educational success. This is a two-year program. Students will train with the ELL team in appropriate classroom behaviors and improve soft skills before pushing into classrooms to assist our monolingual teachers in translating instruction and helping in small group work. These students will have the opportunity to translate in classrooms, during school events, and for one-on-one instruction. Students will earn a YCHS Student-Translator Certificate at the end of their one or two-year program.

High School Newspaper ProductionCourse Number: H0022102011 semester class (0.5 credits) - (ELA Elective)

High School Newspaper Production is a dynamic and hands-on course designed to provide students with the essential skills and knowledge needed to produce a successful school newspaper. Throughout the course, students will explore the fundamentals of journalism, news writing, editing, layout design, and publication management. Emphasis will be placed on developing strong writing skills, critical thinking, research abilities, and effective communication. Students will learn about the principles of journalism ethics and the importance of objective reporting while gaining practical experience in interviewing, gathering information, and verifying sources. They will also delve into various journalistic styles, including news reporting, feature writing, opinion pieces, and investigative journalism.

Topics covered include:

- Digital media tools and software for layout design and multimedia storytelling.
- Use of tools to create visually appealing newspaper layouts, incorporating text, images, graphics, and interactive elements.
- Explore story ideas, assign tasks, and meet deadlines.
- Strategies for engaging their school community
- How to cover events, conduct interviews with students and faculty, and explore issues relevant to their peers.

Newcomer English Language Development A - Course Number: H001008016 1 semester class (0.5 credits) (ELA Core)

Newcomer ELD is a specialized course tailored for students at a WIDA level of 1, focusing on the integration of language development and literacy skills aligned with ELA Common Core Standards. A newcomer is defined as a recently arrived immigrant, migrant or refugee. This course provides a supportive learning environment for students who are new to English, offering a structured approach to language acquisition and literacy that aligns with their unique linguistic needs.

Topics covered include:

- Develop basic communicative skills in English, including listening, speaking, reading, and writing.
- Expand vocabulary across content areas, with an emphasis on academic language necessary for success in English Language Arts and other core subjects.

- Establish foundational literacy skills, including phonics, decoding, and basic reading comprehension strategies.
- Introduce and practice sight words and high-frequency vocabulary essential for early literacy.
- Implement literature-based activities to promote comprehension, analysis, and discussion of age-appropriate texts.

Newcomer English Language Development B Course Number: H001008017 1 semester class (0.5 credits) (ELA Core)

Newcomer ELD is a specialized course tailored for students at a WIDA level of 1, focusing on the integration of language development and literacy skills aligned with ELA Common Core Standards. A newcomer is defined as a recently arrived immigrant, migrant or refugee. This course provides a supportive learning environment for students who are new to English, offering a structured approach to language acquisition and literacy that aligns with their unique linguistic needs.

Topics covered include:

- Develop basic communicative skills in English, including listening, speaking, reading, and writing.
- Expand vocabulary across content areas, with an emphasis on academic language necessary for success in English Language Arts and other core subjects.
- Establish foundational literacy skills, including phonics, decoding, and basic reading comprehension strategies.

- Implement literature-based activities to promote comprehension, analysis, and discussion of age-appropriate texts.

Newcomer Literacy English Language Development A - Course Number: H001008016 - 1 semester (0.5 credits) (ELA Core)

Newcomer Literacy ELD is an innovative auxiliary course designed to provide English language learners with a holistic learning experience that encompasses essential language skills, basic literacy in English, and artistic expression.

Topics covered include:

- Develop fundamental language skills for daily communication, including greetings, introductions, and basic conversations.
- Acquire vocabulary and language structures necessary for practical situations such as shopping, transportation, and healthcare.
- Explore cultural diversity through art, incorporating elements of the students' diverse backgrounds into their artistic creations.

• Create a comprehensive portfolio showcasing language development, basic literacy skills, and cultural exploration throughout the course.

Newcomer Literacy English Language Development B Course Number: H02499901 - 1 semester (0.5 credits) (ELA Core)

Newcomer Literacy ELD is an innovative auxiliary course designed to provide English language learners with a holistic learning experience that encompasses essential language skills, basic literacy in English, and artistic expression.

Topics covered include:

- Develop fundamental language skills for daily communication, including greetings, introductions, and basic conversations.
- Acquire vocabulary and language structures necessary for practical situations such as shopping, transportation, and healthcare.
- Explore cultural diversity through art, incorporating elements of the students' diverse backgrounds into their artistic creations.
- Create a comprehensive portfolio showcasing language development, basic literacy skills, and cultural exploration throughout the course.

Language Arts Proficiency DevelopmentCourse Number: H0199201.11 semester 0.5 credits (ELA Elective)

Language Arts Proficiency Development is a class designed to enhance students' reading and writing skills, aligning with their grade-level Common Core ELA standards. This course will focus on the development of academic vocabulary, mastery of genre-based writing skills, and boosting confidence in grammar and independent writing. Additionally, a significant emphasis will be placed on reading development, aiming to improve comprehension, analysis, and appreciation of diverse texts.

Topics covered include:

- Reading Comprehension and Analysis: Strategies for understanding complex texts, including identifying themes, analyzing character development, and interpreting figurative language across various genres.
- Writing for Different Audiences and Purposes: Developing the ability to craft coherent and targeted writing for academic, persuasive, narrative, and descriptive purposes, considering audience and objective.
- Grammar, Syntax, and Vocabulary Expansion: Enhancing knowledge of grammar and syntax to improve writing clarity and coherence; expanding vocabulary to enrich expression and comprehension.
- Critical Thinking and Discussion: Encouraging critical thinking skills through discussion, debate, and response to texts, enabling students to articulate and defend their interpretations and opinions effectively.

Business Courses

YCS@Work (0.5 credit)

YCS @Work is the Ypsilanti Community High School internal and external Internship Program that allows all our students who meet the eligibility requirements of being enrolled in the YCS @Work Class to obtain a work-site placement in the community after career-scope, soft skills and business foundation skills are assessed.

Business Entrepreneurs (0.5 credit)

Business Entrepreneurs is the Ypsilanti Community High School Program that provides our students with the opportunity to develop their business ideas that impact YCHS and the community through acquiring and enhancing employability skills along with foundational business/marketing/hospitality skills through participation in programs such as YCS @ Work, DECA, Grizzly Store Retail Management, Fundraising, and developing student led signature projects: Shark Tank, Blaze the Stage, Grizzly Gear Monthly Raffle, Snack Shop, and Popcorn Sales.

Marketing A (0.5 credit)

Students that complete this one-year program will develop skillsets in applying social media marketing techniques. They will be tested on best practices of managing social media campaigns, implementing data analysis techniques, making data-driven decisions relative to revenues and profits, and making report-based strategy adjustments. Students that are interested in this pathway are students interested in how advertising works, how ads are placed on social media platforms, the best ways to use social media, or pursuing a career as an influencer. Students will take 2 primary courses for 1-year program: Marketing Foundations and Social Media Marketing. Students that complete this program will earn a Social Media Marketing Certification. This certification is accredited by Google and HubSpot and is valid for 2 years.

Marketing B (0.5 credit)

Students that complete this one-year program will develop skillsets in applying social media marketing techniques. They will be tested on best practices of managing social media campaigns, implementing data analysis techniques, making data-driven decisions relative to revenues and profits, and making report-based strategy adjustments. Students that are interested in this pathway are students interested in how advertising works, how ads are placed on social media platforms, the best ways to use social media, or pursuing a career as an influencer. Students will take 2 primary courses for a 1-year program: Marketing Foundations and Social Media Marketing. Students that complete this program will earn a Social Media Marketing Certification. This certification is accredited by Google and HubSpot and is valid for 2 years.

Social Studies Courses

African American History A (0.5 credit) Course Number: H0406501 This course will look at an often-overlooked, yet incredibly important, portion of American history. In section A of the course, we will examine early facts and concepts that center around the discovery of early man in Africa and the rise of advanced African civilizations to the years of slavery in the United States (including the origins of the slave trade; antebellum plantation-life for slaves, changes in American slavery patterns, etc.).

African American History B (0.5 credit) Course Number: H0406502 (Offered Each Semester - 0.5 Credit Elective/Class can be taken out of sequence) This course will look at an often-overlooked, yet incredibly important, portion of American history. In section B of the course we will look at cultural issues that face African Americans and ultimately society as a whole. The course will, however, primarily focus on the cultural strides (as well as continuing struggles) of African-Americans from the 1900s to the present day. Focus areas will include: Impact of the 13th Amendment, Jim Crow Laws; landmark Supreme Court cases; the struggle for school integration, War On Drugs, Mass Incarceration; Black Lives Matter Movement, the History of Blackface, and Colorism.

Economics (0.5 credit)

The economics content is necessary for the understanding and analysis of a wide variety of applications, including those involving individual and household choices, personal finance issues, business and entrepreneurial decisions, and public policy. Students analyze and study economic concepts and principles in three contextual areas: individual and household context, a business context, and a government or public context focused around four content areas: The Market Economy; The National Economy; the International Economy; and Personal Finance.

Economics Honors (0.5 credit)

The economics content is necessary for the understanding and analysis of a wide variety of applications, including those involving individual and household choices, personal finance issues, business and entrepreneurial decisions, and public policy. Students analyze and study economic concepts and principles in three contextual areas: individual and household context, a business context, and a government or public context focused around four content areas: The Market Economy; The National Economy; the International Economy; and Personal Finance.

Course Number: H00420102

Applied US Hist. A&B (0.5 credit)

This course will examine the history of the United States from Industrialization through the Present. This course will involve a close examination of the implications and effects of the social, cultural, political, and economic developments that have shaped our nation's past including, but not limited to, the Progressive Era, the Great Depression, World War I and II, the Cold War, and the Civil Rights movements.

Government (0.5 credit)

Government is a required course for graduation and covers several aspects of government and will explore the origins of the American democratic system. In addition, students will learn how the constitution embodies the values and purposes set up by the founding fathers. The structure and function of the government will be analyzed on a national, state, and local level while showing how each level is interrelated. This will launch the class into discussing how constitutional values relate to other nations and world affairs. Throughout the course we will focus on how the people play an active role in government and the importance each citizen contributes to society.

Government Honors (0.5 credit)

Life Survival Skills (0.5 Credit Elective) H122206011

Course Number:

The content of this elective course is student guided and project based. Throughout the semester students learn necessary life skills including personal finance, personal fitness and mental health, basic use of hand tools, basic cooking skills and safety, sewing and clothing repair, and car maintenance. Students are encouraged to pursue topics of interest within the curriculum. Lessons are taught both by the classroom teacher, as well as experts in the fields of interest for the class.

Black American Culture: (Social Studies Elective)Course Number: H000406501

1 semester class (0.5 credits)

This elective course provides students with an in-depth exploration of the rich and diverse cultural heritage of Black Americans. Through an interdisciplinary approach, students will examine

the historical, social, political, and artistic dimensions that have shaped Black American culture. Emphasis will be placed on understanding the complexities, contributions, and resilience of Black Americans within the broader context of American society.

Topics covered include:

- Historical overview of Black American experiences, including slavery, emancipation, the Civil Rights Movement, and contemporary issues.
- Cultural expressions in literature, poetry, and oral traditions from the Harlem Renaissance to contemporary Black authors.
- Contributions of Black Americans to music genres such as jazz, blues, gospel, hip-hop, and R&B.
- Exploration of visual arts, including the work of prominent Black American artists and movements such as the Black Arts Movement.
- Examination of Black American contributions to theater, film, and television, highlighting key figures and productions.
- Exploration of social movements and activism within the Black community, including the Black Lives Matter movement.

Physical Education Courses

Physical Education (0.5 credit)

Physical education gives students the ability to grow and develop the necessary motor skills to live healthy lives. The curriculum is designed around the Michigan Merit Curriculum and provides them with opportunities to develop social skills in group activities. This course also encourages students to set personal short term and long term goals based on their kinesthetic achievements. Emphasis is placed on individual and team sports, outdoor recreation, rhythmic/expressive movements and other health related fitness and conditioning activities that empower the cardiovascular and muscular/skeletal system.

Health (0.5 credit)

All students will demonstrate basic core concepts of nutrition and physical activity, social and emotional wellness, sexuality education and the prevention of HIV/AIDS and other communicable diseases. They will also develop skills to resist alcohol, tobacco and other drugs, as well as basic safety procedures needed to demonstrate overall wellness. Through hands-on activities and project based learning, students will apply decision-making and social skills, set healthy life long goals and

Course Number: H0803900

demonstrate healthy behaviors. Students will also be empowered to analyze diverse influences on their health and access valid health resources in their community.

LINK Health (0.5 credit)

This course was developed for students with cognitive disabilities and/or a need for special education services. All students will demonstrate basic core concepts of nutrition and physical activity, social and emotional wellness, sexuality education and the prevention of HIV/AIDS and other communicable diseases. They will also develop skills to resist alcohol, tobacco and other drugs, as well as basic first aid/CPR and safety procedures needed to demonstrate overall wellness. Through hands-on activities and project based learning, students will apply decision making and social skills, set healthy life long goals and demonstrate healthy behaviors. Students will also be empowered to analyze diverse influences on their health and access valid health resources in their community.

Link Health Mentor (0.5 credit)

This course is for students who are interested in mentoring students with cognitive impairments in the Health classroom. Students will be expected to work side by side with their mentees, helping them complete tasks and assignments as well as building social skills. Mentors will also be expected to complete their own Health. All students will demonstrate basic core concepts of nutrition and physical activity, social and emotional wellness, sexuality education and the prevention of HIV/AIDS and other communicable diseases. They will also develop skills to resist alcohol, tobacco and other drugs, as well as basic safety procedures needed to demonstrate overall wellness. Through hands-on activities and project based learning, students will apply decision-making and social skills, set healthy life long goals and demonstrate healthy behaviors. Students will also be empowered to analyze diverse influences on their health and access valid health resources in their community.

Link PE (0.5 credit)

This course is an adapted physical education class designed for students with physical, cognitive and/or other disabilities. Students will be provided with a quality physical education with personal goals as its focus. Students will be paired up with a student mentor to help build locomotor skills, social skills, and other athletic concepts. Classes will take place in the main gym, the indoor pool, outdoors and at the track.

Link PE Mentor (0.5 credit)

Students in this class will be peer mentors for students with physical, cognitive and/or other disabilities. Mentors will be paired up with a mentee to help develop locomotor skills as well as social skills. Mentors are expected to participate in every activity and demonstrate quality behavior for their mentees. Class will take place in the main gym, the pool, outside and at the track.

Course Number: H0800701

Course Number: H00800101

Course Number: H00805101

Lifetime Fitness (Physical Education 11-12) (0.5 Credit) Course Number:

Students will use their kinesthetic knowledge to set personal fitness goals, create fitness plans and learn innovative ways to lead a physically fit lifestyle. This course includes some topics related to cardiovascular endurance, rhythmic/expressive movement, individual/team sports, outdoor recreation, strength/conditioning, flexibility, and balance. Through teamwork as well as individual exercise, students will achieve overall wellness. This class is open to juniors and seniors.

Team Sports (0.5 credit)

Team Sports is a physical activity class that focuses on participation as it relates to cultural, ethnic, gender, and physical diversity in such sports as basketball, baseball, football, soccer, softball, speedball, dodgeball, ultimate Frisbee, volleyball or any game that incorporates teamness.

Yoga, Dance & Aerobics (0.5 credit)

This is an advanced class for students who already passed Physical Education with 75% or higher. It is intended for upper class-man as an advanced physical education elective. Students will be introduced to a variety of yoga styles, forms of dance and aerobic fitness components. Some yoga objectives implement personal health and wellness of the mind and body while integrating movement, meditation, and overall well-being. The dance component of this class offers a variety of rhythmic movements with an emphasis on creative expression and artistic growth. Other fundamentals of this course include Zumba, stepping, core strengthening as well as a variety of dance methods and artistic forms of physical fitness.

Weight Training (0.5 credit)

This is an advanced class for students who already passed Physical Education with a 75% or higher. It is intended for upper class-man as an advanced physical education elective. This course is designed to give students the opportunity to learn weight training concepts and techniques used for obtaining optimal physical fitness. Students will benefit from comprehensive weight training and cardio-respiratory endurance activities. Students will learn the basic fundamentals of weight training, strength training, aerobic training, and overall fitness training and conditioning. The course includes both lecture and activity sessions. Students will be empowered to make wise choices, meet challenges, learn basic anatomy and develop positive behaviors in fitness, wellness, and movement activity for a lifetime.

Personal Fitness (0.5 credit)

Personal Fitness is focused on helping students build knowledge to adopt healthy fitness skills into their daily lives. Many different aspects of exercise will be implemented to help promote an active and healthy quality of life. Many daily activities include but are not limited to a variety of cardio, plyometrics, strength training and conditioning, aerobic, anaerobic exercises and many more. Students will

Course Number: H0800900

Course Number: H0804900

Course Number: H0504900

be expected to participate and give their best effort on a daily basis. Students will improve their physical fitness, increase their heart rate and break a sweat.

Personal Training A (0.5 credit)

Students will participate in a 1-year program that prepares them for a career as a personal trainer. Students who participate in the Personal Training Program will receive an ACE Personal Trainer Certificate once they have completed the course requirements and reached the age of 18. This class can be used in place of Physical Education class.

Prerequisite Classes:

- Health
- Physical Education

Required Classes:

- Personal Trainer Prep 1
- Personal Trainer Prep 2

Personal Training B (0.5 credit)

Students will participate in a 1-year program that prepares them for a career as a personal trainer. Students who participate in the Personal Training Program will receive an ACE Personal Trainer Certificate once they have completed the course requirements and reached the age of 18. This class can be used in place of a Physical Education class.

Prerequisite Classes:

Health

Physical Education

- Personal Trainer Prep 1
- Personal Trainer Prep 2

World Languages Courses

Spanish I A (0.5 credit) Spanish I B (0.5 credit)

Course Number: H0610101 Course Number: H0610112

This introductory course is designed for students with little or no previous study of Spanish. Some students in class might have studied Spanish in middle school, but have not grasped some of the important structures of the language. This course teaches

71 Last Modified on March 16, 2024

Course Number:

basic language patterns and vocabulary. Repetition and comprehensible input are important components of this course. Focus is on all four language skills: listening, speaking, reading and writing. Culture is an integral part of the course and is introduced through the use of media, games, adapted readings and class discussions. In addition to written tests and quizzes, students may also be assessed by means of a variety of activities, many of them participatory in nature. Homework assignments are an integral part of this course; they reinforce concepts/skills introduced and explored in class, which enable students to participate in class in a meaningful way. Completion of homework assignments is a must. Active participation is required.

Spanish II A (0.5 credit) Spanish II B (0.5 credit)

Course Number: H0610201 Course Number: H0610212

This course is a continuation of the objectives and skills presented in Spanish I. It is designed to present materials in such a way that the student will derive pleasure and satisfaction in acquiring the language skills through topic based curriculum and comprehensible input with exposure in all four areas of language acquisition: listening, speaking, reading, and writing. The course will focus on daily life, healthy living, personal information, and travel and leisure to progressively enable the students to increase communicative proficiency, vocabulary, and give exposure to various language structures to increase overall language proficiency. Students will be exposed to different cultural perspectives, customs, art, food, and music of the countries where Spanish is spoken.

Visual Arts Courses

3D Art (0.5 credit)

Course Number: H0050515901

3D Art Design is a studio project orientated class exploring different media areas of 3 Dimensional and Graphic design. The emphasis of this course is to expose students to 3D art mediums and to build their creative skills through the elements and principles of design.

ART I A (0.5 credit)

Course Number: HST610A

This is a comprehensive course that provides students with the knowledge and opportunity to explore an art form and to create individual works of art. This course may also provide a discussion and exploration of career opportunities in the art world. It will cover the language, materials, and processes of a particular art form and the design elements and principles supporting a work of art. As students advance and become more adept, the instruction regarding the creative process becomes more refined, and students are engaged to develop their own artistic styles. Although this course focuses on creation, they may also include the study of major artists, art movement, and styles.

ART I B (0.5 credit)

Course Number: HUN600B

This is a comprehensive course that provides students with the knowledge and opportunity to explore an art form and to create individual works of art. This course

may also provide a discussion and exploration of career opportunities in the art world. It will cover the language, materials, and processes of a particular art form and the design elements and principles supporting a work of art. As students advance and become more adept, the instruction regarding the creative process becomes more refined, and students are engaged to develop their own artistic styles. Although this course focuses on creation, they may also include the study of major artists, art movement, and styles.

Community Art_(0.5 credit)

Course Number: H0519900

Course Number: H0515600

Course Number: H0515601

Course Number: H0515900

Course Number: H0516701

Community Art will explore the way in which art integrates itself into the community by way of murals, sculptures, and performance. This class will create art in the community using different mediums while understanding what community art is already present. Particular attention will be paid to the different cultures and the rich community history of Ypsilanti.

Drawing A (0.5 credit) Drawing B (0.5 credit)

Drawing is an art class that concentrates on developing the principles of design while utilizing the elements of art. The basic building blocks of shape and form are emphasized while exploring different styles and movements in art. Students will learn everything from drawing using the grid method to designing a comic strip. They will incorporate design elements such as shading, perspective, proportion, texture, and value in all of their works.

Ceramics (0.5 credit)

Pottery courses cover the same topics as Experiments in Art, but focuses on creating three-dimensional works out of clay and ceramic material. Particular attention is paid to the characteristics of the raw materials, their transformation under heat, and the various methods used to create and finish objects.

Photography (0.5 credit)

Photography is an intensive introduction to photography, concentrating on composition, photo fundamentals (ISO, shutter speed, f/stop) and camera operation. Areas of investigation include exposure control, online storage, curating and presenting. A significant amount of time will be spent researching and discussing contemporary photographers as well as photo history. The end of the term will yield a firm working knowledge of the photographic process and a familiarity with many of its applications. Expectations of work outside of class include photographing events, such as athletics and dances, and ongoing engagement with Google Drive to review photos.

Commercial Photography (0.5 credit) Course Number: H122151011

Commercial photography is a comprehensive look into the business of photography. A brief introduction to photography is given at the beginning of the semester followed

by a thorough explanation and demonstration of the commercial studio equipment. No matter the subject, whether it is food, product or person, understanding and/or manipulating the light to achieve a desired look will be the outcome. Expectations of work outside of class include reaching out to and working with a business in the community to help market their product(s).

Yearbook I A (0.5 credit) Yearbook I B (0.5 credit)

Course Number: H1110401 Course Number: H1110412

(Year Long Course - 1 Credit Required)

The yearbook course has been designed to provide students with the journalism skills and the ability to apply those skills to the actual production of the yearbook. Units of study include teamwork, responsibility, brainstorming, content, coverage, concept, reporting, writing, headlines, captions, editing, photography, typography, design, graphics, finances, yearbook campaigns, advertising and distribution. The work done by the yearbook staff is a real-world experience that results in the current volume of our school's yearbook. The publication strives to maintain a tradition of excellence in which the school and the community can take pride. Mastery of the goals and objectives educate staff members in all areas of publication production. *Students must commit to both semesters of the course before signing up for the class.*

Film Study: (Art Elective)

Course Number : H000520301

1 Semester Class (0.5 credits)

High School Film Studies is an engaging and comprehensive course designed to explore the art, history, and impact of cinema. Through a combination of film screenings, discussions, readings, and analytical assignments, students will delve into the rich tapestry of cinematic storytelling, examining films from various genres, time periods, and cultural perspectives.

Topics Covered Include:

- fundamental elements of film analysis
- Cinematography
- Editing, sound, mise-en-scène, and narrative structure.
- Use of elements to convey meaning, evoke emotions, and create compelling cinematic experiences.
- Various genres of film
- Examining thematic styles; stylistic choices, and cultural significance.
- Assess the artistic merits and storytelling techniques employed by filmmakers.

Vocal Music Courses

Choir A (0.5 credit)

Course Number: H0511001

Students develop comfortability in performing in the community and have up to 20 public performances per school year. They learn presentation skills, cooperation,

discipline, accuracy in performance, and extensive soft skills. Students who engage in performing arts for a minimum of 1 academic year earn the Performing Arts Certification. This certification is provided to all students upon completing their senior year of choir, piano, or band.

Choir B (0.5 credit)

Course Number: H0511012

Students develop comfortability in performing in the community and have up to 20 public performances per school year. They learn presentation skills, cooperation, discipline, accuracy in performance, and extensive soft skills. Students who engage in performing arts for a minimum of 1 academic year earn the Performing Arts Certification. This certification is provided to all students upon completing their senior year of choir, piano, or band.

Instrumental Music Courses

Keyboard/Piano (0.5 Credit)

Course Number: H0510700

Piano class is offered to students in grades 9-12 of varying experience. Students may enroll in a piano class for multiple semesters. Students will progress from wherever they are, be it beginner or accomplished. Students will use sheet music to learn piano literature of many different genres; folk, classical, New Age, pop, etc. Students will have the opportunity to perform in a public piano recital. Students who are eligible for membership in the high school band must be:1.) previously enrolled in band at the middle school level 2.) be recommended by one of the band directors 3.) have an interview and audition to get an accurate assessment of his/her musical skills for placement. Upon acceptance in the program, the parents will be notified of the policies and expectations of the band program. Generally, an ongoing observation will follow during the year to make sure the student is meeting the minimum requirements of the class.

Symphonic Band A (0.5 credit) Symphonic Band B (0.5 credit)

Course Number: H0510601 Course Number: H0510612

Prerequisite: MS band participation or approval from the band director. This class expands the middle school band curriculum and adds: style, interpretation, and improvisation. This course is designed to teach self-discipline, teamwork and higher level thinking skills necessary to express one's self through music. It requires more of a commitment to excellence. It will include a balanced comprehensive study of music that develops skills in the psychomotor, cognitive and affective domain. Classroom activities are designed to develop elements of musicianship, including tone production, technical skills, intonation, music reading skills and the integration to other applicable disciplines. A number of public performances at formal concerts and/or band contests serve as the culmination of classroom instruction and musical goals. After school rehearsals, performances and activities are part of the course grade. These activities are an integral element that support and extend learning in the classroom.

Band A (0.5 credit) Students in the band study a woodwind, brass, or percussion instrument throughout

the school year. Those new to playing an instrument begin their musical journey in the fall in Introduction to Band and focus on developing the fundamental skills needed to find long-term success in music. They learn the exercises, short melodies, and full concert pieces. Returning band students in the Symphonic band continue to learn increasingly advanced scales, exercises, and pieces of concert music while focusing more on technique and professional musicianship. Students who engage in performing arts for a minimum of 1 academic year earn the Performing Arts Certification. This certification is provided to all students upon completing their senior year of choir, piano, or band.

Band B (0.5 credit)

Students in the band study a woodwind, brass, or percussion instrument throughout the school year. Those new to playing an instrument begin their musical journey in the fall in Introduction to Band and focus on developing the fundamental skills needed to find long-term success in music. They learn the exercises, short melodies, and full concert pieces. Returning band students in the Symphonic band continue to learn increasingly advanced scales, exercises, and pieces of concert music while focusing more on technique and professional musicianship. Students who engage in performing arts for a minimum of 1 academic year earn the Performing Arts Certification. This certification is provided to all students upon completing their senior year of choir, piano, or band.

Communication and Theater Arts Courses

Drama I A (0.5 Credit)

Course Number: H0505101

(Offered Each Semester - 0.5 Credit Elective/ prerequisite for those interested in Stage Performance)

Music Appreciation: Grades 9, 10, 11, 12 **Course Number: H0511800**

(0.5 Credit) **Prerequisite:** None. This course teaches multiple aspects of music, including; basic elements of music, music analysis, beat making, movie music, music and instruments from other cultures, Classical music history, and Contemporary music history. This course contains multiple music based writing assignments, soundtrack creation, and music composition.

Keyboard (0.5 credit)

The beginner keyboard course lasts about 6-9 months, which includes basic fingering techniques, fundamental music theory, sight reading, basic chord progression, song application and ear training exposure.

Course Number: H0510700

Course Number:

A dramatic experience is intrinsic in human development. An introduction of dramatic games and exercises will be used as a way of sharpening imagination, building interpersonal relationships and most importantly strengthening individual identity.

Stage Performance (0.5 Credit)

Course Number: SP10000

(Offered Each Semester - 0.5 Credit Elective)

Stage Performance will give students an opportunity to take some of the tools learned in drama and combine them with theater concepts that will allow students to perform. This class will create a platform for the student voice to be heard on issues youth face.

Student Support Services Courses

Career Success Skills 11 (0.5 credit)

Students identify areas of career interest and complete introductory career and life skills units (social-emotional/communication, functional living, soft skills). Students with Individualized Education Plans (IEPs) build upon critical skills necessary to achieve career success. Skills covered include but are not limited to: soft skills (email etiquette, computer usage, study skills, organizational/time management skills, etc.), practical writing (resumes, cover letters, thank you letters, etc.), functional reading (technical/informative) and functional math skills (budgeting, bank account math, etc.). Students will also be able to participate in optional programs with Michigan Rehabilitation Services (MRS), a statewide network of professionals developing and delivering individualized services that assist potential employees with differing abilities to prepare for, pursue and retain careers. Students who participate in this pathway will receive a YCHS Career Success Skills certificate upon successful completion of their senior year.

Career Success Skills 12 (0.5 credit)

Course Number:

Course Number:

Students complete a senior project using the T-Folio components (College/vocational school exploration, job preparation, personal writing, etc.). Students with Individualized Education Plans (IEPs) build upon critical skills necessary to achieve career success. Skills covered include but are not limited to: soft skills (email etiquette, computer usage, study skills, organizational/time management skills, etc.), practical writing (resumes, cover letters, thank you letters, etc.), functional reading (technical/informative) and functional math skills (budgeting, bank account math, etc.). Students will also be able to participate in optional programs with Michigan Rehabilitation Services (MRS), a statewide network of professionals developing and delivering individualized services that assist potential employees with differing abilities to prepare for, pursue and retain careers. Students who participate in this pathway will receive a YCHS Career Success Skills certificate upon successful completion of their senior year.

Community Based Education (0.5 credit)

This course applies and further develops transitional skills that can be applied to adult living. Community Based Education teaches the functional academic skills needed to participate successfully in Community Based Education, which provides authentic learning experiences that can not be replicated or simulated in the school environment. This course is the application of learned skills, including traveling in the community and completing work experiences. This course is based on the Life Centered Education (LCE) curriculum from the national Council for Exceptional Children as well as a student's individual education plan (IEP) goals. This course has no prerequisites and can be taken multiple times. Placement by IEP Team only

Community Living (0.5 credit) Course Number: H2225112

This course is to apply and further develop transitional and functional math skills that can be applied to adult living. Community Living teaches the functional academic skills needed to participate successfully in Community Based Education, which provides authentic learning experiences that can not be replicated or simulated in the school environment. This course is based on the Life Centered Education (LCE) curriculum from the national Council for Exceptional Children as well as a student's individual education plan (IEP) goals. This course has no prerequisites and can be taken multiple times. Placement by IEP Team only

Employment Skills (0.5 Credit) Course Number: 22152

This course is to apply and further develop transitional and functional reading skills that can be applied to adult living. Employment Skills teaches the functional academic skills needed to participate successfully in Community Based Education, which provides authentic learning experiences that can not be replicated or simulated in the school environment. This course is based on the Life Centered Education (LCE) curriculum from the National Council for Exceptional Children as well as a student's individual education plan (IEP) goals. This course has no prerequisites and can be taken multiple times.

Placement by IEP Team only

Work Habits (0.5 Credit)

This course teaches functional vocational skills and habits in a school setting. Students complete school-based internships and work tasks. These skills are then applied in the Community Based Education classroom. This course can be taken in conjunction with Community Based Education. This course is a hands-on application of vocational skills that aligns with the Life Centered Education (LCE) curriculum from the National Council for Exceptional Children as well as a student's individual education plan (IEP) goals. This course has no prerequisites and can be taken multiple times.

Placement by IEP Team only

returning a student to the general education classroom. Placement by IEP Team only

Applied Biology (1.0 Credit)

Based on student needs, sections of Resource Room Biology or a Science elective are taught. These Science classes provide access to the general education curriculum at a pace to meet the individual students' needs. Students will receive direct instruction, whole and small group learning, online assistance and individualized homework. The resource room class is taught with the goal of returning a student to the general education classroom. Placement by IEP Team only

Academic Support 9 (0.5 credit) Course Number: H22003019

Academic Support is a class that provides extra support in any subject to students. This class will review concepts that were taught in the student's core content courses. Students work on organizational skills, work completion, and transitional goals. Students will also utilize this time to include any testing accommodations based on their individual plans. Placement by IEP Team only

Academic Support 10 (0.5 credit)

Academic Support is a class that provides extra support in any subject to students. This class will review concepts that were taught in the student's core content courses. Students work on organizational skills, work completion, and transitional goals. Students will also utilize this time to include any testing accommodations based on their individual plans. **Placement by IEP Team only**

Academic Support 11 (0.5 credit)

Academic Support is a class that provides extra support in any subject to students. This class will review concepts that were taught in the student's core content courses. Students work on organizational skills, work completion, and transitional goals. Students will also utilize this time to include any testing accommodations based on their individual plans. Placement by IEP Team only

Academic Support 12 (0.5 credit)

Academic Support is a class that provides extra support in any subject to students. This class will review concepts that were taught in the student's core content courses. Students work on organizational skills, work completion, and transitional goals. Students will also utilize this time to include any testing accommodations based on their individual plans. Placement by IEP Team only

Life Survival Skills (0.5 credit)

Life Skills (LS) classes are designed to meet the needs of students whose intellectual, developmental and academic levels are so delayed that participation in the general education program, even with modifications and accommodations is unfeasible.

Special Preparation Courses

University Preparation for Dual Enrollment Eligibility:(0.5 Credit) Course Number: H2200320

This class is designed to prepare students to meet the special rigor of a college class offered at the high school level. In order to dual enroll in a college class while still enrolled at ACTech, students must achieve final grades of "B" or better in the university prep class. The class will focus on specific skills development for university success. These include meeting faculty and peer expectations, research paper writing, paraphrasing and summarizing, critical analysis, discussion, and fluency; lecture and note-taking skills, academic reading and writing, public speaking, vocabulary and grammar, and etiquette.

College and Career Readiness/Support Courses

Strategic Reading (0.5 credit)

The purpose of this course is to help students reach increased literacy skills through the use of whole group instruction, small group study, independent reading, interactive technology applications, and writing. The majority of work in this class is individualized for each student. Our goal is to increase strengths in reading and writing applications to promote advancement in student's post-secondary pathways.

College Math Lab (0.5 Credit)

The main purpose of this class is to ensure our dual enrolled (DE) students are prepared and able to successfully take college-level math classes. This may include working on Aleks modules to improve math assessment levels or receiving assistance in high school or college math classes. Secondarily, it will be a time for DE students to update their Educational Development Plan (EDP) and any documentation needed for graduation requirements.

College Lab ELA (0.5 credit)

The main purpose of this class is to ensure our dual enrolled (DE) students are prepared and able to successfully take college-level math classes. This may include working on ELA modules to improve math assessment levels or receiving assistance in high school or college math classes. Secondarily, it will be a time for DE students to update their Educational Development Plan (EDP) and any documentation needed for graduation requirements.

College and Career Readiness (1.0 credit) Course Number: H2215103

(Year Long Course - 1 Credit Required) College and Career Readiness is designed for you, the student. It will help you begin to think about why you are here, where you are going, and how to make the best use of your time while transitioning to college, trade school, or your career. The course will challenge you both personally and academically. You will be asked to think critically, reflect on your opinions and

Course Number: H02999011

Course Number: H0120301

experiences; and to articulate those opinions verbally through in-class discussions and written work. You will also be asked to present some of what you have learned and experienced to the class. A portion of this class is dedicated to identifying and completing the documents required to complete <u>Senior Project Portfolio</u> and <u>Senior</u> <u>Defense Presentation</u> obligations as well as preparing each student for his or her education beyond high school.

Career and Technical Education Courses

Automotive Technology 2A (2.0 credit)Course Number: H20104012Automotive Technology 2B (2.0 credit)Course Number: H20104013Automotive Technology Credit: 2 year program (11th & 12th Grade)

The Automotive Technology program is a NATEF Certified program designed to educate students to perform maintenance and light vehicle repair. The skill sets provide a learning experience and skill sets for a variety of jobs within the automotive industry, which are in high demand. This is accomplished with classroom instruction coupled with hands-on experience in the shop. Students will have access to shop cars and tools. Students will be exposed to ASE sections including: engine repair, suspension & steering, brakes, electrical/electronic systems, heating & air conditioning. Seniors that return for a second year will build upon the foundation by applying the logic to the systems and a deeper understanding of how the systems work together. Automotive Technology students can earn articulated credit with Washtenaw Community College or Baker College.

The program provides an opportunity to participate in the Career Technical Student organizations such as Skills USA, where they may compete against other schools.

The Automotive Technology program is an Automotive Service Excellence (ASE) Accredited training program. This is an entry-level course for automotive technology students that utilizes the state-mandated ASE automotive maintenance and light repair curriculum. During the two-year course, students will study personal and shop safety, tool, equipment, shop operations, basic engine fundamentals, and basic technician skills. Students will also study electrical and engine performance (tuneup)steering, suspension, and alignment, as well as brakes. Upon successfully completing the maintenance and light repair course and passing the ASE student certification tests, students may enter the automotive service industry as entry-level ASE Certified MLR technicians. The class is approximately 65% lab work and 35% classroom. Work-based learning opportunities are available to students in the program. Also, upon completion of this two-year program, students have the opportunity to take the ASE student certificate test; upon passing, they enter the automotive service industry as an entry-level ASE certified MLR (Maintenance and Light Repair) technician. Students also receive a certificate for each semester they successfully pass.

Collision Repair Tech 2A (2.0 credit)Course Number: H02010601Collision Repair Tech 2 B (2.0 credit)Course Number: H020106012Collision Repair Technology Credit: 2 year program (11th & 12th Grade)

RCTC Collision Repair Technology Is A NATEF certified training program. Students have the opportunity to develop their knowledge and skills through applied theory and hands-on shop projects. The class is very hands-on with plenty of time spent in the lab repairing cars. Students will apply what they have learned in Auto Collision Repair on a daily basis. Students will have the ability to decide what area of auto collision repair they would like to pursue. Careers that students may enter include, but are not limited to: body repair technician, refinishing technician, automotive parts specialist, detail technician, damage estimator, collision repair mechanic, Structural Technician, and insurance adjuster. Careers in this field are in high demand. Students have the opportunity to participate In an internship and Work-Based Learning where they will work at a local shop, get paid, and receive credit for attending class. Students may earn a senior math credit as well as an applied arts credit. Students may also elect to go on to a post-secondary school or college to pursue further education. Students may earn articulated credit with Washtenaw Community College, or Baker College. Collision repair students will have the opportunity to participate in Career Technical Student organizations such as Skills USA, where they may compete against other Schools using their Technical training.

Upon completion of the two-year program, students are given the opportunity to take the State of Michigan Collision Repair test. Students are also given a certificate of completion for each semester they pass. They can obtain the following certification: CTE Collision Certificate (upon completion of 2-year course), ASE Student Certification (contingent on passing ASE test); Eligible for 24 I-CAR certifications, Ford Pass Certification, and SP2 Certifications. This is an ASE-accredited training program which is a two-year course of study in which students will be trained in seven areas of collision repair. Using the I-CAR LIVE curriculum, students will do structural and non-structural repairs on today's high-tech automobiles. Students will learn the basics of automotive MIG welding, plastic welding, and plastic repair. The painting course will cover single and two-stage refinishing, paint, and shop safety, and basic customer painting. Collision repair shop management and estimates are covered, as well as collision repair-related mechanics. Upon completion of the twoyear course, students should be able to pass the State of Michigan Collision Repair certification tests. Employment opportunities are available through on-the-job training in partnership with local collision repair shops.

Culinary Arts & Hosp Mgnt 2A(2.0 credit)Course Number: H01605401Culinary Arts & Hosp Mgnt 2B(2.0 credit)Course Number: H016054012Culinary Arts and Bakery ScienceCourse Number: H016054012

Credit: 2 year program (11th & 12th Grade) Course Number:

Culinary Arts and Bakery Science is for the student who wants to study in the culinary arts, bakery science or hospitality industries. In this class, students have the opportunity to explore the exciting and developing professions in the culinary industry and bakery science industries using the National Restaurant Association ProStart curriculum. Through the ProStart program, high school students can learn career-building skills and get a taste for success in an industry that is hungry for talent. The student will become acquainted with the best practices in all phases of the culinary and bakery industry. Upon completion of this course, students will have a working knowledge of:

- Preparing for a successful career in the hospitality industry
- Preparing and serving safe food
- Preventing accidents and injuries
- Kitchen basics
- Foodservice equipment
- Nutrition
- Culinary essential skills
- Bakery essential skills
- Pastry/dessert basics
- Cake decoration basic
- Menu planning
- World foods

- Salads and garnishes
- Culinary math and costing
- Fruits and vegetables
- Controlling foodservice cost
- Planning and producing events
- Knife skills

Students can earn up to 7 industry recognized certifications. Some of the certifications can be used to articulate college credit and all can be helpful in getting a high paying job or possible promotions in the students' current job. The certificates that can be earned are ServSafe Food Handlers, ServSafe Allergens, ServSafe Safe Alcohol Service, ServSafe Managers, ProStart Year 1, ProStart Year 2 and ProStart National Certificate of Achievement. Washtenaw Community College is a partner of RCTC Culinary Arts and Bakery Science and ProStart and therefore offers students up to 10 articulated college credits. Students must pass ProStart level 1 and 2 tests (years 1 and 2), then the ServSafe Managers test and have a B or better in RCTC to get these classes articulated. Juniors will be on the right track for these credits however 1st-year seniors will be able to earn the benefits as well. These are the classes that will be articulated.

- Sanitation and Hygiene 2cr
- Culinary Principals 3cr
- Baking Science 2cr
- Fundamentals of Bakery 3cr
- All 10 credits will apply to a culinary OR bakery degree.

Along with WCC many other colleges offer similar amounts of articulation. Just a few of the culinary schools and colleges are The Culinary Institute go Michigan, Lake Michigan College. Northern Michigan University, The Culinary Institute of America, Johnson and Wales University, Sullivan University and many more.

RCTC Culinary Arts and Bakery Science is a two-year program for the student who wants to explore or study in the culinary arts, bakery science, or hospitality industries. Cosmetology A Year 1 (0.5 credit) CTE

CTE Cosmetology is a two-year program that instructs students in the theory and practical skills necessary to prepare them for a career in the cosmetology field. Students are provided with up-to-date, hands-on training geared toward preparing students to become highly employable through their incorporation of knowledge and experience. Students will have opportunities in such roles as cosmetologists, nail technicians, make-up artists, hair stylists, salon managers, and small business owners. This class is an introduction and participation class in basic services

performed by cosmetologists. This lecture/lab class is closely supervised in the introduction and practice of shampooing, draping, hair analysis, hair treatment, nail care, haircutting, wet styling, thermal styling, permanent waving, chemical relaxing, hair coloring, skincare, and hair removal services. Basic anatomy and physiology, hair structure, skin structure, nail structure, and analysis will be included in the class. Emphasis will be placed on salon safety measures, sanitation, and infection control. Students will practice on mannequins, models, and each other.

Upon completion of this program, students are eligible to sit for their Michigan Cosmetology PSI Examination and apply for Michigan State Cosmetology License.

Cosmetology B Year 1 (0.5 credit) CTE

CTE Cosmetology is a two-year program that instructs students in the theory and practical skills necessary to prepare them for a career in the cosmetology field. Students are provided with up-to-date, hands-on training geared toward preparing students to become highly employable through their incorporation of knowledge and experience. Introduction to Skilled Trades (0.5 credit)

Introduction to Skilled Trades is a class that prepares students for careers in technical jobs supporting the maintenance, upkeep, and light repair of residential, commercial, and multi-family properties. This is a 1-semester course that gives students the ability to explore the following areas: carpentry, electrical, plumbing, HVAC, and welding. This course will prepare interested students for WCC courses in HVAC or welding and potentially a CTE course in construction technology. The technical coursework in this program provides education and training in the five technical skills areas. In addition to the technical theoretical knowledge coursework, students will study nontechnical coursework needed to support further training and certification in those specific trades.

Podcast A (0.5 credit)

Podcasting is a 1-year program comprising 2 courses(Podcasting I & II) for students who are interested in sound recording, hosting, public speaking, and debate, particularly for students interested in a career as an on-air host, podcast production, editing, and audio engineering. Students must complete 2 semesters and the following milestones of podcasting to receive certification: 6 published episodes, Digital Portfolio, a Show Website, Podcast Branding, and Final Reflection. Students will develop skills and certificates in the following areas: General Podcasting, On-Air Hosting, Producing, Audio Engineering, and Editing.

Podcast B (0.5 credit)

Podcasting is a 1-year program comprising 2 courses(Podcasting I & II) for students who are interested in sound recording, hosting, public speaking, and debate, particularly for students interested in a career as an on-air host, podcast production,

Other Courses

Exploratory Literature (0.5 credit)

The purpose of the class is to expose students to different genres, to review the various literary elements and text structures used by authors, and to encourage a lifelong enjoyment of reading. The class begins with an introductory unit and whole class reading of an anchor fiction and anchor nonfiction text, during which time we'll review literary elements and text structures and model effective reading strategies.

Creative Writing (0.5 credit)

Course Description: Creative Writing is designed for students to create original forms of descriptive writing, poetry, drama and fiction. Vocabulary development, creative writing techniques, and skills are explored. Students submit their work to local and national magazines.

Read 180 A (0.5 credit)

Read 180 is an intense, comprehensive reading intervention program used to increase students' reading levels. ... The program consists of whole and small group direct instruction, independent reading, writing practice, and computer-based individualized instruction.

Read 180 B (0.5 credit)

Read 180 is an intense, comprehensive reading intervention program used to increase students' reading levels. ... The program consists of whole and small group direct instruction, independent reading, writing practice, and computer-based individualized instruction.

Employability Skills (0.5 credit)

This course is designed to teach students how they can make a difference in the workplace based on their behavior. In addition, students will learn how to effectively address problems that might arise in the workplace. Central to any employee's growth is the understanding that he or she is part of a working community that includes employers, employees, and customers or clients. Special responsibilities and commitments come with being employed. Each employee must learn to embrace these responsibilities if he or she is to succeed at work. On the practical level, employees need to know how to do well on the job and how to keep the job. Early training in building conscientious work habits will stand employees in good stead for

Course Number: H0106701

Course Number: H0106712

Course Number 22152

the rest of their working lives. It also forges links between their willingness to accept responsibility for their actions and the rewards they get for developing a sense of responsibility.

Social Justice (0.5 credit)

Explores the concepts of justice, conflict and social change and examines the ways in which political, economic, media, education, and other institutions create challenges for justice. Also examines efforts to resist existing structural and institutional arrangements and encourage social change to better meet human needs.

Advisory (0.5 credit)

Student Advisory provides the opportunity and time for students to complete classroom assignments or school projects. Students typically work on their own, without the help of a tutor; however, they are supervised and usually remain in the classroom. In Student Advisory, each student in the school is assigned a teacher or staff member who assists the student in achieving his or her academic and personal goals. Advisory usually has two distinct parts: an advisory class, similar to a homeroom, and one-to-one advisement to address personal issues. While their goals are similar, schools organize and implement their advisory programs in a variety of ways depending on the needs of the school community and our focus on the use of priority standards.

Credit Recovery (0.5 credit)

Credit recovery is a term used to describe a wide variety of educational strategies and programs that give high school students who have failed a class the opportunity to redo coursework or retake a course through alternate means—and thereby avoid failure and earn academic credit.

Certified Nursing Assistant (CNA) 9 College Credits Course Number:

Certified Nursing Assistant (CNA) are responsible for helping patients with daily living activities, assisting with personal hygiene, and maintaining a safe, clean environment. In this program, students also receive hands-on training in performing basic nursing tasks such as taking vital signs, moving patients, and providing personal care. We spend the last portion of the course in a Long-Term Care Facility with the students caring for their own residents. The program is comprised of 5 WCC courses that are taken simultaneously: Basic Nursing Assistant Skills, Healthcare Terminology, Healthcare Exploration, CPR/AED & First Aid, and Yoga I. Students have the opportunity to earn 9 college credits during this program, have the ability to take the state CAN exam (upon turning 18), and CPR certification.

Dual Enrollment through WCC – (Can earn as many as 60 credit hours/ An Associate Degree)

Students have the opportunity to enroll in WCC classes for college credit beginning their 11th-grade year. They are able to earn an approved WCC Associates Degree or

Course Number: H0410601

Course Number: H2200305

Course Number

as many as 60 transferable college credits. Students can earn a MEMCA Certificate. This certificate is awarded to hard-working students who are enrolled in the middle college program who earn the following: State of Michigan MMC requirements; 15 transferable college credit hours (non-remedial courses, earning a C or higher); 100 hours of verified community service; 40 hours of verified career exploration/ internship hours, or 70+ hours combined. Students must earn 6's in both reading and writing components of the ACCUPLACER test. Students typically begin their college courses by taking a first-year English and/or Communication course. Then leading into higher-level English, electives, and potentially mathematics courses (dependent on ALEKS scores). The Summer Bridge Program is available for interested students over the summer to improve math, English, and writing skills in order to prepare students for dual enrollment.

9-12 ACCE Course Catalog

English Language Arts Courses

English 9 A (0.5 Credits) English 9 B (0.5 Credits)

Course: H0100101 Course: H0100112

YCS partners with HMH (Houghton Mifflin Harcourt) to provide a rigorous and indepth program of study designed to blend online and classroom learning for all K-12 students throughout our district using the Into Literature program. Through Into Literature, English 9 prepares students with a foundation in listening, speaking, reading, and writing through studies of literature and composition. Types of literature may include biographies, autobiographies, essays, short stories, dramas, speeches, and novels. Students explore literature, employing critical and analytical evaluation of literary works. Written expression lessons allow students to develop and demonstrate skills in composition, grammar usage, and the writing process. Students also make text to world connections through the selections and apply their ideas to their own life. Additionally, coursework prepares students for success on college entrance assessments such as the SAT and ACT. This course fulfills the requirements for one credit of ninth grade English for graduation.

English 9 A OL (0.5 Credits) English 9 B OL (0.5 Credits)

English 10 B (0.5 Credits)

YCS partners with HMH (Houghton Mifflin Harcourt) to provide a rigorous and indepth program of study designed to blend online and classroom learning for all K-12 students throughout our district using the Into Literature program. Building on the 9th grade curriculum, English 10 integrates listening, speaking, reading, and writing through studies of literature and composition. Types of literature may include biographies, autobiographies, essays, short stories, dramas, speeches, and novels. Students explore literature, employing critical and analytical evaluation of literary works. Written expression lessons allow students to develop and demonstrate skills in composition, grammar usage, and the writing process. Additionally, coursework prepares students for success on college entrance assessments. This course fulfills the requirements for one credit of tenth grade English for graduation.

English 11 A (0.5 Credits) English 11 B (0.5 Credits)

YCS partners with HMH (Houghton Mifflin Harcourt) to provide a rigorous and indepth program of study designed to blend online and classroom learning for all K-12 students throughout our district using the Into Literature program. Throughout English 11, students will build upon the language arts skills gained in 9th and 10th grades to read and analyze both literary fiction and nonfiction and to write collegeready literary analysis and argument papers. Students will review and practice college- and career-ready speaking and listening skills. Both literary fiction and nonfiction will be introduced as vehicles for self-exploration and self-improvement, in conjunction with discussion and writing, as we read with a focus on social justice, stewardship, and sustainability. Additionally, a portion of this class will be focused on preparing students for college entrance assessments. This course fulfills the requirements for one credit of eleventh grade English for graduation.

building interpersonal relationships and most importantly strengthening individual identity.

Math Courses

Algebra I A (0.5 Credits) Algebra I B (0.5 Credits)

Algebra I includes the study of properties and operations of the real number system; solving and graphing first degree equations and inequalities; translating word problems into equations; exponential growth and decay, systems of linear equations, introduction to statistics, operations with and factoring of polynomials; and introductions to graphs of quadratic equations.

Algebra I A OL (0.5 Credits) Algebra I B OL (0.5 Credits)

Algebra I OL includes the study of properties and operations of the real number system; solving and graphing first degree equations and inequalities; translating word problems into equations; exponential growth and decay, systems of linear equations, introduction to statistics, operations with and factoring of polynomials; and introductions to graphs of quadratic equations.

Algebra II A (0.5 Credits) Algebra II B (0.5 Credits)

Algebra II topics include a review of linear equations and inequalities; operations with rational and irrational expressions; transformations, factoring of rational expressions; quadratic equations; solving systems of linear and nonlinear equations; graphing of functions; properties of polynomial equations; and properties of radical functions, investigating exponential and logarithmic growth and decay, and further work into data analysis and statistics.

Algebra II A OL (0.5 Credits) Algebra II B OL (0.5 Credits)

Algebra II OL topics include a review of linear equations and inequalities; operations with rational and irrational expressions; transformations, factoring of rational expressions; quadratic equations; solving systems of linear and nonlinear equations; graphing of functions; properties of polynomial equations; and properties of radical functions, investigating exponential and logarithmic growth and decay, and further work into data analysis and statistics.

Geometry A (0.5 Credits) Geometry B (0.5 Credits)

Geometry topics include transformations, concepts of congruence, similarity, angle relationships within parallel and perpendicular lines, proportions, rules of angle

101 Last Modified on March 16, 2024

Physics B (0.5 Credits) **Course: H0315112 Prerequisite: Completed Algebra I.** Physics involves the study of matter and energy and the interactions between them. This course will explore the topics of motion,

Consumer Math A OL (0.5 Credits) The purpose of this course is to focus on every day applications of basic math skills as they are applied to real life topics. Students will learn how to use basic math skills for situations such as buying a car, budgeting money, investing, paying taxes, etc.

shapes, right triangle trigonometry, and data analysis and statistics.

Consumer Math B OL (0.5 Credits)

Geometry A OL (0.5 Credits)

Geometry B OL (0.5 Credits)

The purpose of this course is to focus on every day applications of basic math skills as they are applied to real life topics. Students will learn how to use basic math skills for situations such as buying a car, budgeting money, investing, paying taxes, etc.

measurements of polygons, exploring dimensional measurement, area and volume of

angle relationships within parallel and perpendicular lines, proportions, rules of angle measurements of polygons, exploring dimensional measurement, area and

volume of shapes, right triangle trigonometry, and data analysis and statistics.

Financial Literacy A&B OL (1.0 Credit)

Financial Literacy includes the study of numeracy, financial literacy and vocabulary of Algebra I. Topics include numeracy using mathematical relationships to reason with numbers and numerical concepts, to think through the math logically, to have a repertoire of strategies to solve problems, and to be able to apply the logic outside of classrooms.

Science

Earth Science A OL (0.5 Credits) Earth Science B OL (0.5 Credits)

Earth Science offers insight into the environment on earth and the earth's environment in space. While presenting the concepts and principles essential to students' understanding of the dynamics and history of the earth, this course usually explores oceanography, geology, astronomy, meteorology, and geography.

Environmental Science A OL (0.5 Credits) Environmental Science B OL (0.5 Credits)

Students will dive deeper into the Earth's four spheres (hydrosphere, atmosphere, biosphere, and geosphere) that they learned in Earth Science. During this course they will connect the four spheres to environmental problems/policies/factors to better understand anthropogenic and biogenic impacts on the planet.

Chemistry A (0.5 Credits) **Chemistry B (0.5 Credits)**

Chemistry involves studying the composition, properties, and reactions of substances. This course typically explores such concepts as the behaviors of solids, liquids, and gasses; acid/base and oxidation/reduction reactions, atomic structure. and conservation of matter. Chemical formulas and equations and nuclear reactions are also studied.

Social Studies

Economics (0.5 Credits)

The economics content is necessary for the understanding and analysis of a wide variety of applications, including those involving individual and household choices, personal finance issues, business and entrepreneurial decisions, and public policy. Students analyze and study economic concepts and principles in three contextual areas: individual and household context, a business context, and a government or public context focused around four content areas: The Market Economy; The National Economy; the International Economy; and Personal Finance.

Students analyze and study economic concepts and principles in three contextual areas: individual and household context, a business context, and a government or public context focused around four content areas: The Market Economy; The National Economy; the International Economy; and Personal Finance.

Government (0.5 Credits)

Government is a required course for graduation and covers several aspects of government and will explore the origins of the American democratic system. In addition, students will learn how the constitution embodies the values and purposes set up by the founding fathers. The structure and function of the government will be analyzed on a national, state, and local level while showing how each level is interrelated. This will launch the class into discussing how constitutional values relate to other nations and world affairs. Throughout the course we will focus on how the people play an active role in government and the importance each citizen contributes to society.

World Languages

Spanish I A (0.5 Credits) Spanish I B (0.5 Credits)

This introductory course is designed for students with little or no previous study of Spanish. Some students in class might have studied Spanish in middle school, but have not grasped some of the important structures of the language. This course teaches basic language patterns and vocabulary. Repetition and comprehensible input are important components of this course. Focus is on all four language skills: listening, speaking, reading and writing. Culture is an integral part of the course and is introduced through the use of media, games, adapted readings and class discussions. In addition to written tests and quizzes, students may also be assessed by means of a variety of activities, many of them participatory in nature. Homework assignments are an integral part of this course; they reinforce concepts/skills introduced and

Completion of homework assignments is a must. Active participation is required.

Spanish II A (0.5 Credits) Spanish II B (0.5 Credits)

This course is a continuation of the objectives and skills presented in Spanish I. It is designed to present materials in such a way that the student will derive pleasure and satisfaction in acquiring the language skills through topic based curriculum and comprehensible input with exposure in all four areas of language acquisition: listening, speaking, reading, and writing. The course will focus on daily life, healthy living, personal information, and travel and leisure to progressively enable the students to increase communicative proficiency, vocabulary, and give exposure to various language structures to increase overall language proficiency. Students will be exposed to different cultural perspectives, customs, art, food, and music of the countries where Spanish is spoken.

Art

Art Appreciation OL (0.5 Credits)

Art Appreciation is a general introduction to the visual arts, media, techniques, and history. ... This course reviews two- and three-dimensional art forms, methods, and media; examines the visual elements and principles of design; and briefly surveys art styles from the prehistoric to the 20th Century.

Art 1 A (0.5 Credits) Art 1 B (0.5 Credits)

This is a comprehensive course that provides students with the knowledge and opportunity to explore an art form and to create individual works of art. This course may also provide a discussion and exploration of career opportunities in the art world. It will cover the language, materials, and processes of a particular art form and the design elements and principles supporting a work of art. As students advance and become more adept, the instruction regarding the creative process becomes more refined, and students are engaged to develop their own artistic styles. Although this course focuses on creation, they may also include the study of major artists, art movement, and styles.

Music

Music Appreciation OL (0.5 Credits)

Course Description: Music Appreciation introduces students to the discipline of music through listening, discussion, lectures, and analysis. The course traces the historical development of music with an emphasis on Western art music.

Spoken Word 2/Music Appreciation (0.5 Credits) **Course: H01157110**

Spoken Word and Slam Poetry is all about studying, writing, and performing in the exuberant. genre-defying, political, personal, raucous. and powerful performance poetry scene.

Spoken Word Poetry (0.5 Credits)

There are elements of spoken word poetry that you need to include when your write: **Rhyme**, **rhythm** (breaks and beats), diction, parallel sentence structure. Elements of a successful presentation include: gesture, eye contact, intonation, expression, body language.

CTE

Collision Repair Technology A (2.0 Credits) Collision Repair Technology B (2.0 Credits)

RCTC Collision Repair Technology Is A NATEF certified training program. Students have the opportunity to develop their knowledge and skills through applied theory and hands-on shop projects. The class is very hands-on with plenty of time spent in the lab repairing cars. Students will apply what they have learned in Auto Collision Repair on a daily basis. Students will have the ability to decide what area of auto collision repair they would like to pursue. Careers that students may enter include, but are not limited to: body repair technician, refinishing technician, automotive parts specialist, detail technician, damage estimator, collision repair mechanic, Structural Technician, and insurance adjuster. Careers in this field are in high demand. Students have the opportunity to participate In an internship and Work-Based Learning where they will work at a local shop, get paid, and receive credit for attending class. Students may earn a senior math credit as well as an applied arts credit. Students may also elect to go on to a post-secondary school or college to pursue further education. Students may earn articulated credit with Washtenaw Community College, or Baker College. Collision repair students will have the opportunity to participate in Career Technical Student organizations such as Skills USA, where they may compete against other Schools using their Technical training.

Automotive Technology A (2.0 Credits) Automotive Technology B (2.0 Credits)

Course: H2010401 Course: H020106012

The Automotive Technology program is a NATEF Certified program designed to educate students to perform maintenance and light vehicle repair. The skill sets provide a learning experience and skillsets for a variety of jobs within the automotive industry, which are in high demand. This is accomplished with classroom instruction coupled with hands-on experience in the shop. Students will have access to shop cars and tools. Students will be exposed to ASE sections including: engine repair, suspension & steering, brakes, electrical/electronic systems, heating & air conditioning. Seniors that return for a second year will build upon the foundation by applying the logic to the systems and a deeper understanding of how the systems work together. Automotive Technology students can earn articulated credit with Washtenaw Community College or Baker College.

The program provides an opportunity to participate in the Career Technical Student organizations such as Skills USA, where they may compete against other schools.

Culinary Arts and Hospitality Mgmt. A (2.0 Credits)Course: H1609801Culinary Arts and Hospitality Mgmt. B (2.0 Credits)Course: H1609812

Culinary Arts and Bakery Science is for the student who wants to study in the culinary arts, bakery science or hospitality industries. In this class, students have the opportunity to explore the exciting and developing professions in the culinary industry and bakery science industries using the National Restaurant Association ProStart curriculum. Through the ProStart program, high school students can learn career-building skills and get a taste for success in an industry that is hungry for talent. The student will become acquainted with the best practices in all phases of the culinary and bakery industry. Upon completion of this course, students will have a working knowledge of:

- Preparing for a successful career in the hospitality industry
- Preparing and serving safe food
- Preventing accidents and injuries

- Kitchen basics
- Foodservice equipment
- Nutrition
- Culinary essential skills
- Bakery essential skills
- Pastry/dessert basics
- Cake decoration basic
- Menu planning
- World foods
- Salads and garnishes
- Culinary math and costing
- Fruits and vegetables
- Controlling foodservice cost
- Planning and producing events
- Knife skills

Students can earn up to 7 industry recognized certifications. Some of the certifications can be used to articulate college credit and all can be helpful in getting a high paying job or possible promotions in the students' current job. The certificates that can be earned are ServSafe Food Handlers, ServSafe Allergens, ServSafe Safe Alcohol Service, ServSafe Managers, ProStart Year 1, ProStart Year 2 and ProStart National Certificate of Achievement. Washtenaw Community College is a partner of RCTC Culinary Arts and Bakery Science and ProStart and therefore offers students up to 10 articulated college credits. Students must pass ProStart level 1 and 2 tests (years 1 and 2), then the ServSafe Managers test and have a B or better in RCTC to get these classes articulated. Juniors will be on the right track for these credits however 1st-year seniors will be able to earn the benefits as well. These are the classes that will be articulated.

- Sanitation and Hygiene 2cr
- Culinary Principals 3cr
- Baking Science 2cr
- Fundamentals of Bakery 3cr
- All 10 credits will apply to a culinary OR bakery degree.

Along with WCC many other colleges offer similar amounts of articulation. Just a few of the culinary schools and colleges are The Culinary Institute go Michigan, Lake Michigan College. Northern Michigan University, The Culinary Institute of America, Johnson and Wales University, Sullivan University and many more.

Physical Education

Physical Education (0.5 Credits)

Physical Education gives students the ability to grow and develop the necessary motor skills to live healthy lives. The curriculum is designed around the Michigan Merit Curriculum and provides them with opportunities to develop social skills in group activities. This course also encourages students to set personal short term and long term goals based on their kinesthetic achievements. Emphasis is placed on individual and team sports, outdoor recreation, rhythmic/expressive movements and other health related fitness and conditioning activities that empower the cardiovascular and muscular/skeletal system.

Emphasis is placed on individual and team sports, outdoor recreation, rhythmic/expressive movements and other health related fitness and conditioning activities that empowers the cardiovascular and muscular/skeletal system.

Health (0.5 Credits)

All students will demonstrate basic core concepts of nutrition and physical activity, social and emotional wellness, sexuality education and the prevention of HIV/AIDS and other communicable diseases. They will also develop skills to resist alcohol, tobacco and other drugs, as well as basic safety procedures needed to demonstrate overall wellness. Through hands-on activities and project based learning, students will apply decision-making and social skills, set healthy life long goals and demonstrate healthy behaviors. Students will also be empowered to analyze diverse influences on their health and access valid health resources in their community.

Course: H2100403

Engineering Design courses offer students experience in solving problems by applying a design development process. Often using solid modeling computer design software, student development, analyze, and test product solutions models as well as communicate the features of those models.

College and Career Readiness

College and Career Readiness A OL (0.5 Credits) Course: H22151030L

College and Career Readiness is designed for you, the student. It will help you begin to think about why you are here, where you are going, and how to make the best use of your time while transitioning to college, trade school, or your career. The course will challenge you both personally and academically. You will be asked to think critically, reflect on your opinions and experiences; and to articulate those opinions verbally through in-class discussions and written work. You will also be asked to present some of what you have learned and experienced to the class. A portion of this class is dedicated to identifying and completing the documents required to complete <u>Senior Project Portfolio</u> and <u>Senior Defense Presentation</u> obligations as well as preparing each student for his or her education beyond high school.

College and Career Readiness B OL (0.5 Credits) Course: H22151040L

Study Skills

Skill Building (0 Credits)

Advanced formation or reformation of professional and personal qualities, the mastery of new ways of solving professional problems and new methods of professional thinking, overcoming negative attitudes and the inhibitory influence of past experience, changing the motivational and operational sphere of professional activity, the emergence of the person himself as a subject of further training.

Advisory (0.25 Credits)

Student Advisory provides the opportunity and time for students to complete classroom assignments or school projects. Students typically work on their own, without the help of a tutor; however, they are supervised and usually remain in the classroom. In Student Advisory, each student in the school is assigned a teacher or staff member who assists the student in achieving his or her academic and personal goals. Advisory usually has two distinct parts: an advisory class, similar to a homeroom, and one-to-one advisement to address personal issues. While their goals are similar, schools organize and implement their advisory programs in a variety of ways depending on the needs of the school community and our focus on the use of priority standards.
